LIST OF COMPANIES, ORGANIZATIONS AND MANUFACTURERS FOR ELECTRIC POWER PROJECT

Introduction

The Egyptian Ministry of Electricity and Energy and its affiliated Authorities and Companies have adopted an ambitious program for the localization of all services, supplies and industries related to the sector projects. Since then many local manufacturing and services companies have emerged, these companies now manufacture a large portion of the components of the power generation and distribution projects.

All components are being manufactured in accordance with the international governing standards and to the highest level of quality. The dependability and soundness of such components have been proven through their extensive use in the sector's projects for over a decade, additionally foreign purchasers now appreciate the quality of such products and depend on Egyptian manufacturers to provide components for their future projects.

The number of local manufacturers now producing components for the power projects has greatly increased during the past years. Additionally the variety of products currently produced in Egypt is great. Accordingly the need to initiate a guide for the manufacturers and the products has emerged. This guide is a compilation of manufacturers, firms, and service companies working in the power sector in Egypt. It is intended to be used by both local and foreign purchasers and to facilitate the communication with the Egyptian sources.

Hoping that this guide will provide all buyers/ purchasers with information that facilitates their suppliers search, and hoping that the dependability on Egyptian products flourishes and continues to grow in the future .

Main Activities:

- 1- Full range of consultancy and engineering services in all fields of Power System Maintaining the highest international technical standards:
 - Project investigation
 - Document and engineering services
 - Project implementation
 - Operation and training
 - Project management
 - Design work.
- 2- Arrangements or contracts with several of such specialists as in-house consultant or as independent external consultant.

Examples of executed projects:

- 1- Extension for Co-Generation Project- Talkha
- 2- preparation of Qualification Documents for Zafarana Wind Farm Project.
- 3- Study for the installation of a 220/30 kV S/St for feeding steel rolling company.
- 4- GIS information system for MV network of Monofia District.
- 5- Alexandria high voltage network development up to year 2015.
- 6- Protection coordination of Ras Ghareb Electric network.
- 7- Extension of Cairo East control center.
- 8- Design of Electrical networks for many projects in Egypt.
- 9- Modification of some 220 kV TLs in Egypt
- 10- Tower spotting foundation design for some TL in Egypt.
- 11- Supervise erection of some cables in Egypt.
- 12- Employment services for Tabouk Electric Company in Saudi Arabia.
- 13- Provision and installation of AMPLISMA package for Tabouk Electric Company in Saudi Arabia.
- 14- Consulting services for the required technical personnel needed in Fannar Company in Saudi Arabia.
- 15- Investigation for Rehabilitation of Iraq network.

A 3 - Shaker Consultancy Group

Construction Date	: 1982

Address	20 lotfy hassona st. Doki - Giza
Tel.	(202) 3351030 / (202)3363239
Fax	(202) 3363237

Main Activities:

The scope of engineering services of Hussein Sabbour Consulting Engineering Bureau " HSCEB " covers the following :

Financial Feasibility Studies for different types of projects as:

1-Engineering Design:

- Construction Planning.
- Architectural Design.
- Landscape.
- Structural Design.
- Internal Sanitary Works.
- Electrical Design.
- Mechanical Design.
- Communication.
- Fire Systems.

2-Utilities:

- Roads.
- Water Supply.
- Sewage Works.
- Electrical Works.
- Communication.
- Bill of Quantities, Specifications, and Contracts.

3-Projects Design Management:

- Cost Estimations.
- Scheduling the Design Activities.
- Follow-Ups and Coordination between the different engineering specializations.
- Forming the different Joint Ventures and Consortiums necessary for different types of projects.
- Revision and Quality Control.

4-Construction and Execution Management:

- Projects Management.
- Construction Management.
- Construction Site Supervision.

9	Industrial Construction	> 100	LE

**B 2- HIGH DAM ELECTRICAL AND INDUSTRIAL
PROJECTS
COMPANY (HIDELECO)**

HIDELECO has experience in the installation of the hydro-electric power station, extra high voltage substation and overhead transmission lines 500, 220 & 132 KV.

The company has executed many important projects either in Arab Republic of Egypt or Arab Countries (Lybia, Saudi Arabia, Algeria, Sultanate Oman, United Arab Emirates and Morocco) with high efficiency and precision.

Main Activities:

Supply and erection of:

- Power stations either thermal or hydro or wind farms.
- Substation of different voltages up to 500 KV.
- Overhead transmission lines up to 500 KV.
- Laying under ground cables to 220 KV.
- Industrial projects.
- Pumping stations either for irrigation or sewage purposes.
- Medium & low voltage distribution systems in new cities.

Example of executed projects:

1. Installation to turbines, pipe lines, cranes & gates for Aswan II hydro-electric power station (4X75 M.W).
2. Completed rehabilitation of High Dam hydro-electric power station turbines.
3. Complete rehabilitation of the boilers steam turbo-generating power station of Damanhour (3x15 + 3x65 M.W) and Assiut (3x30 M.W).
4. Gas turbo-generating sets complete with civil works, fuel tanks, fuel pumping systems and thermal & electrical control systems for many power plants.
5. Five substations 220/66/11 kV for Lower Egypt , Three substations 132/66/11 kV for Upper Egypt and twenty eight substations 66/11 kV for Lower Egypt.
6. Over head transmission lines, double circuits, 1657 km of 220 kV, 130 km of 132 kV , 1054 km of 66 kV and 340 km of 33 kV.
7. Underground cables with joints, 98.78 km of 66 kV.
8. Changing insulators of the 500 kV transmission line from Aswan High Dam to Cairo (1000 km).
9. Installation of all mechanical and electrical equipment for many industrial projects.
10. Installation of equipment for Rural electrification projects for some some Governorates in Egypt.
11. Supply and erection of medium and low tension equipment for some cities in Egypt.
12. Many diesel and gas generating power stations of various capacities in different locations.
13. Maintenance and rehabilitation of existing power stations, substations, transmission lines and medium & low tension equipment of different cities and villages.

B 3-MISR COMPANY FOR MECHANICAL AND ELECTRICAL PROJECTS (KAHROMIKA)

KAHROMIKA is specialized in installation of mechanical and electrical projects. The company enlisted the services of a group of highly qualified engineers, accountants, administrators and technicians who had acquired extensive experience from projects appertaining to the power sector such as power plants and transmission lines.

Communication Data:

Main Activities:

Supply & erection of:

- 1- Sheet metal works for steam power stations;
- 2- Substations of Different voltages 500, 220, 66, 33, & 11 kV;
- 3- Storage tanks of different capacities.;
- 4- Transmission towers of different voltages 220, 66, 33, & 11 kV;
- 5- Light and heavy built-up sections ;
- 6- Welded pipes of large diameters.

Example of executed projects:

- 1- El- Kurimate Power Station 2x 320 MW;
- 2- Sidi Krir Power Station 2x 320 MW;
- 3- Ayoun Musa Power Station 2x 320 MW;
- 4- Abu-Qir Power Station (4x150 MW + 1x325 MW)
- 5- Talkha Power Station (3x 12.5 + 3x 30 + 2 x 210 MW)
- 6- Damietta Combined Cycle Power Station (6x 150 MW)
- 7- Extension of Nag Hammadi substation 500/132 kV;
- 8- 98 substations of different capacities in Egypt;
- 9- 1400 kms of 220 kV double circuits TL with foundations
- 10- 1200 Kms of 132, 66, 33 kV TL;
- 11- 930 kms of cables complete with joints for 220, 66, & 33 kV;
- 12- Fabrication and supply of 60000 Tone Towers for Egypt
(66,22 &11 kV);
- 13- Fabrication and supply of 40000 Tone Towers for Lebanon (11 kV);
- 14- Boilers for Abu Qir power station 500 Ton, Damanhour power station
300 Ton;
- 15- National Energy Control Center;
- 16- Protection system projects for the 500 kV network in Cairo 500,
Samalut, Nag Hammadi and High Dam substations.

B 4- THE ARAB CONTRACTORS OSMAN AHMED OSMAN & Co.

The Arab Contractors is one of the largest construction firms in the Middle East. The company is dedicated to revitalizing its people, resources, knowledge and experience base to serve the community. This is achieved by providing premium quality construction services at fair rates, being responsive to customers, merging market mandates in a responsible and efficacious manner and producing a sustained growth posture that will secure its dominant position in the construction services industry for years to come.

The Arab Contractors is devoted to maintaining high quality standards and upholds work either that empower employees and ensure better working conditions requisite for top quality production and customer satisfaction.

Main Activities in the field of Power Stations and Electrical Networks:

- 1- Installation of all steel structure Building for Power Plants;
- 2- Manufacture and installation of Gantry cranes up to 375Ton capacity.; and overhead cranes.
- 3- Low Tension Electric Boards & Control Boards;
- 4- Electric Generator Trailer;
- 5- Mobile Units & Caravans up to 240x 240x 720;
- 6- Gratings all types;
- 7- Metallic Gears Up to Ø 1400 mm;
- 8- Electric Welding Transformers 50 – 600 A;

Example of executed projects:

- 1-Cairo West Power Station 660 MW;
- 2- Abu Sultan Thermal Power Station 600 MW;
- 3- Ayoun Musa Thermal Power Station 640 MW;
- 4- Installation of all steel structure buildings (about 9000 Tons for 12 buildings);
- 5- Diesel Generating Power Plant at Balaks (3x5 + 1x2.5 MW – 11 kV);
- 6- Installation of Gas Turbine in Salhia (3x3.5 MW – 11 kV);
- 7- Installation of Gas Turbine in Shabab Area (4x25 MW – 11 kV);
- 8- Installation of substation in Salhia (3x20 MVA – 66/11 kV);
- 9- Installation of substation in Ayat (2x12.5 MVA – 66/11 kV);
