Childhood divine

Was not a child prodigy, it is a normal child, its very unusual, does not save from the first time, but saves and forget, sometimes leiah conservation, was sometimes staying a full day trying to memorize one verse, he even cry on the last day; because he did not could save the verse, the same thing during the save of the conversations, Vqdarath normal, but manna from Allah - the Almighty - that kept him out of wheat to save songs, empty talk, which fills the minds of children and their minds, to save what help him to his religion and worldly affairs, God willing.

When completed five years had kept the two parts of the Koran, he received an exemption from the requirement to age, and entered the first grade Azhari, was quick in the maintenance of the Koran, which fully accomplished at the age of six years and two months.

Face the sheikhs and scientists to save the Sunnah, keeping the book "Forty-nuclear," Victab "pearl and coral," and then save it Sahih Al-Bukhari, who fully and ten years old and two months.

Then went to the podium; to deliver the khutbah, the sermon was the first mosque of his village, was launched after it was named to the top of mosques in all the provinces and regions, but also invited Arab and Islamic countries; to deliver speeches and lectures.

Science, including Sheikh Al-Azhar of God upon the grace of the Holy Quran, the Hadith, he decided to exclude for the second time; to jump from fifth grade elementary preparatory to the first row.

Went a journalists to his home; to conduct an exclusive interview, and began shooting, go to the chair next to the couch which was sitting upon, and after taking some pictures of him and his father, he took his camera, and asked that Hu is photographed with his father, then took him to the recording device, and said to him :

- when it proceeds in the registry, you must make the key sound at the lowest degree, even if the recording, and raised the pitch of the voice, it will sound more clear.

Thanked him for this advice is correct, and once asked his father to hear the news some of what saves from the Koran and the traditions, even taking the remixes of his clothes, withdrawn by the longing down and settle (fitness), and adjusted to moderate somewhat in its, all of that and the press follow him in astonishment, it was felt that in these few moments of fun, go quietly and the doom of innocent childhood to the SMT and the dignity of scholars.

Child tubular!!

Took the woman's egg and fertilized in vitro fertilization by sperm of her husband, after the division of the egg was allowed to grow in the laboratory, becoming an embryo in its early stages, has entered in her womb for the completion of its composition, even if the birth goes well.

The experiment and tries since 1950, that came on the twenty-fifth of July 1978 and was born the first child artificial insemination (fertilization in the laboratory) in Britain, and was named "Louise Brown," since that time, was born about 4 million children in this way, in 2010 awarded the Nobel Committee in Kaorlienska Foundation (Academy of Sciences), the Swedish Nobel Prize in Medicine, said: "Abu IVF" British doctor. Dr. Robert Edwards (85 years):

- The most important thing in life is to kicking a child, nothing is more important than the child.

24 hours a day

Income on the boy and his father asked him:

- O "Baba," How many hours of the day?

Looked at him with great surprise:

- Do not you know?!
- Yes, but I want to make sure you know!

- Are you kidding me?!
- No, God, no kidding, but I am talking seriously.

- Today (24) hours.
- Well done, O my father, it is sunrise to sunrise the next day, estimated time to (24) hours, night and day Ancoan of the earth's rotation on its axis from west to east.

- Excellent and I have, today is night and day balled.
- This is known as the solar day.

- Solar today!
- Yes, there is what is known as stellar day and the lunar day.

- Have you taken this in science class in school?
- Yes, I will explain to you, the earth moves around the sun and change their positions for the stars, their movement towards the east, the star appears to move toward the West, if the sun with a star at the same time, the next day out the star before sunrise four minutes, today stellar equivalent to (23) hours and (56) minutes.

- good my love, this stellar today, what about the moon?
- as well as the moon moves around the earth from west to east; ie, delayed by twilight (48) minutes, so the lunar day (24) hours and (48) minutes.

- Open your God, my son, but the man does not pay attention to the stellar or lunar day, Flaqath social and economic development depends on the solar day only.
- This is true my Daddy, but some neighborhoods adjust its activity depending on the day star and the lunar day, along with the solar day.

1.2.3 (123)!

Adham was sitting in front of the TV watching a film Krtonaa, it was not at home, a family member of him and his mother.

His mother came from the kitchen; to overlook it, and gave him full in accordance with the etc. (Vichara) - Adham, who loves him so much - Vodath in front of him, and he looked to his mother with a smile look at satisfaction and happiness, and began to eat this (popcorn) delicious.

And his mother left him and returned to the kitchen; in order to complete the processing for lunch brothers Adham present in their schools, and found his father in his work.

Remained Adham watching cartoon favorite to him, and the voice of television is high, and eye and ear on the TV, and his hand stuck to (popcorn) and put it in his mouth, and suddenly heard Adham voice too high for the fall of the dishes come from the hand room the kitchen, where his mother, stood up from his place and was rushed to the point it hit the plate (popcorn), turned against his foot on the ground, went into the kitchen and found some dishes, spoons, fill the kitchen floor, and his mother lying on the middle ground!!

He stood crying and screaming, and approached his mother, speak with them but they do not pronounce, and saw blood pouring from her head which was wounded, his mother has lost consciousness completely.

Returned the father of his work and the children from their schools, they found the apartment door broken and stretched only, they entered Mvzoaan are looking for Adham and his mother, but they did not find one of them inside the apartment, Vvzawa hard, and anxieties grew when they entered the kitchen and found a mess, dishes broken, and central traces of blood! !

Father came out of the apartment asking neighbors in the apartments nearby for his wife and his son, Adham, but unfortunately the answer was: do not

know where they went! All of them were in their jobs, and their children were in schools and universities.

Stop the father and his sons very confused thinking, Vensahh a neighbor that the guard asking Architecture (doorman) them, it is possible to know where they went.

Fastgulwa the elevator and the rest of the neighbors took on peace, hastening to room guard, Matarqan upon his door closed, and children calling his name, but he did not want them, surely is abroad, brought out the father his mobile phone, and called on a guard, replied, after a while, he said his father: Where you, man?! Have you not seen my wife and my son Adham today?!

Ranger: I'm with them now, sir, we are in the hospital, and me your son Adham, tired and your wife was taken to the hospital, and is now still in the operating room, the process of appendicitis!!

The father a deep breath, and Hamad God, and then asked him, in any hospital? The guard told him the name of the hospital; father rode his car, accompanied by his children, neighbors and rode their cars, and drove us all to the hospital.

Entered the hospital, they found the guard sitting in the parlor, sitting next to him Adham, in his hand a bag of potato to eat it, he bought his guard; because it is hungry, has not eaten anything since morning, but some (popcorn), who did not eat it all.

The father asked the guard: Where is my wife now? Before speaking guard, told him one of the nurses that she had an operation to remove the appendix, which was on the verge of explosion, has emerged since the minutes of the operating room to room, intensive care, even recovering from the effects of the drug (anesthetic), and will not see until after two hours from now, Now you can wait in the hall, even moved to another room.

Went the father of the queries; to know who came with his wife to the hospital, as the guard told him that he was surprised by ambulance, and asked him to medics open the door of the apartment, where they heard crying and screaming Adham behind the door, but it is still three years old, not able to open the door, the guard asked him to move away from the door; until they broke the door.

Indeed, the "termination" section, and his medics, and found the mother lying on her back in the kitchen floor, and surrounded by blood, Vhmloha on a stretcher after making sure they are still alive.

Adham took the guard, and pull the door of the apartment "Mufsuch" without being shut completely.

Very astonished father, if it is contact the ambulance?! Please proceed to the receptionist: Is my wife is that I called you to send an ambulance?!

He replied: No, no, who contacted us is a very small child, was crying crying heavily, and did not understand his words of nothing but simple words as mama, Blood, kitchen.

Vvhemena that there are sick and can not talk on the phone, he took this child to speak in his place, and certainly is the son Adham as long as he was with his mother in the apartment, but the paramedics when they arrived, they found your wife in the case of fainting full, and certainly did not move from its place since it fell to the ground! !

Said Father: How do you know the title apartment?!

Employee smiled and said, sir, by Caller ID, it is through the phone number of your apartment we know the title is accurate, then praise be to God that the connection came from a landline, not mobile; so that we can find out the address.

Passed several hours.

Mother woke up from anesthesia, and began to absorb everything that happens around them, and I spoke and I knew what happened to her, but did not remember anything since she was cooking in the kitchen, and suddenly did not feel anything, her husband asked her: who contact the hospital?!

Vsktaat, and said: Do you call a hospital?! Is certainly the Adham.

She smiled, and asked to see Adham, Vahdharoh them; asked her doctor who performed her surgery: how he knew Adham at this age, a small number related to ambulance?!

I looked at the mother of Adham, and she said: Adham, No. Do you know the hospital?

Adham remained silent for a moment, and said the hospital 1 to 2 - 3 (one - two - three).

Mother said: I always save it you number the hospital.
1 to 2 - 3; any: (123) emergency number!!

Super rice!

I entered upon my colleagues at work, found them discussing the result of the recent referendum, which was in Switzerland, regarding the law to prevent the approval of the construction of minarets of Muslim mosques them, found them divided to two teams: Team supporter, and another shows strongly, I sat a few minutes to listen to these and those, the modern heated, when I felt that voices rise and increase in height, preferred to intervene and the best of engagement with something wholesome and useful, attracting their attention, and drive them out of the vicious circle that will not reach them to nothing but the narrow, diphtheria, or quarreling.

He lifted my hand to them:

- Have you heard what did the Swiss scientists?

Vsktwa all of us, looking to me in case of surprise, everyone one of them:

- We do not know, what did they do?!

She smiled, looked at them quickly found them in the case of longing, waiting to hear the answer:

- managed a team of Swiss scientists through genetic engineering technology to reach a new type of rice plant, it can save millions of human beings from malnutrition caused by iron deficiency.

He raised his eyebrows one of them:

- actually there in the continents of Asia and Africa about two billion people are living with severe anemia, certain that the new rice will contain a large amount of iron?

- Yes, scientists can control the genes of a rice grain types; to contain six times the normal content of iron!

Vaccination with potatoes!

Ahmad sits in front of the TV watching ads, a declaration by one, he saw a new declaration for a new type of potatoes ready for children.

Once the announcement is over quickly rose from the place He calls out to his father:

- Dad, Dad.

Blown voice of the father of his appeal, leaving the paper, which was read by, and asked him:

- What you, Ahmed?! Did not see you Mvzoaa to this degree?!
- I heard that there is a new potato will be vaccinated children, the first type: Potato virus against cholera, and the second: Fbtatts against virus diarrhea, is this true, O (BBA)?!
- Certainly, O Ahmed, is done by genetic engineering techniques!

Faqata Ahmad and his father:

- Sorry, Dad, I mean they will add to the vaccination potato before frying or after?!

He smiled, saying to him:

- No, Ahmed, but will taste the same plants grown potatoes, where botanists will produce new varieties of genetically engineered potatoes; potatoes so that the immunizations and vaccinations normally.

Ahmed shook his head, he tries to accommodate this modern scientific complex:

- The meaning of your words is this, O Pope that he would be the treatment of children in the future by the food, not medicine?! If the child eats potato bag

ready (Shipsey)?!

Father pointed with his hand, declaring his joy Ahmed:

- Yes, my son; has become a fact, already been the production of bananas is now used in vaccination against hepatitis of type (b), since I have read a few newspaper story says that a group of researchers in the field of genetic engineering have produced fruit containing the growth hormone for use in feeding children with Palace tall, rather than injection therapy hormone their bodies!!

An indelible imprint!

Every day down American soldiers, on the roads of Afghanistan, bombs, booby-trapped sign them, and placed in the hands of Mquaomém, fed military leaders fed up, are no longer tolerate such losses, do not know how to identify the perpetrators, they sent to the Director of Criminal Police of the FBI, asking for a way to get fingerprints those hands, from the metal surfaces, even if they have observed.

Once that relates to a message of distress, around the whole to Dr. John Bond, director of scientific support Police North Hampton Shire, began to think about it, went into his lab's he established his home, has been looking for a way to monitor the hallmarks of a fixed, hard to erase, that guided his mind to the way reveal the corrosion that occurs in metal surfaces, when the fingers touch the human; a result of small impacts left by salt in the human race.

The experiment and study, a device designed to be integrated to make several stages, so get photocopies of the prints, even on the day of the press conference to announce a new innovation, a journalist asked him:

- Is it possible to explain to us that the new technology?

Looked at her and smile on her face:

- Quite simply, I came metal to be lifted fingerprints from it, and presented to an electric current rate of 2500 volts, and then I came beads, ceramic-coated powder soft like a powder used in copiers, and then you ship this beaded ceramic Similarly, poured on the metal; fully demonstrating the powder places corrosion in the metal, then Hrgueth oven; to retain the parts are worn, then photographed image to match fingerprints.

One of those present raised his hand press conference, wants to take the floor, who identified himself, as an investigator in the FBI, the question to Dr. Bond:

- This means we can now re-examine old issues that have been frozen; to lack of access to a directory?
- The marks on the surfaces of disclosed technical metal that can not be erased, as they do not spoil!

Chaotic collapse!

Every time he enters the dissolved find the number of bees on the decrease, the cells do not abandon the Bees come back to her at all, notes the actions of cells examines the bizarre worker bees, making these cells contain a smaller number of eggs, there is no production of honey for good!

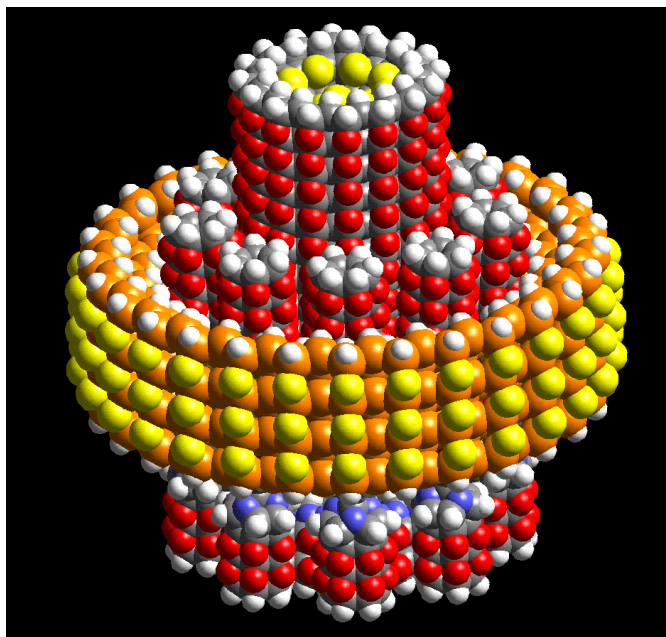

Not a week goes by, however, comes an expert in beekeeping; to take consulted in the disaster, and every time because one of them the phenomenon back to viruses or parasites or pesticides which Archha farmers are owners of land adjacent to the promiscuous, or of genetically modified crops that are planted in recent years or to changes Climate transmitting country, but ultimately did not reach one of them to the real cause of the problem, has been the number of bees down eerily, contact someone who knows them from the owners of beehives, ask them and lcheoarham to no avail; because this phenomenon did not appear with them before, they are strange case did not know apiaries.

Advised by a friend that looking on the Internet for information about the behavior of bees, and may arise from the changes, to be connected to a scientific study by a group of Indian scientists at the University "Punjab", when he said the research team about the possibility of throwing the blame on mobile phones with regard to decline acute in the numbers of bees around the world.

Up to the reality that there are several stations to strengthen the mobile phone takes Bmnhalh in nearby fields, completed the dialogue read the study, where enhanced experiences researchers from that hypothesis, where they were

placed in the hive phones laptops, has been operated twice a day for a quarter of an hour at a time, as they put in another cell device is switched off, they discovered three months after a significant decline in the number of bees in the cell that has been developed mobile operators which, astonished the owner of the dissolved, when he read the changes that have occurred in the behavior of bees, which were detected by these Indian scientists, as if they were talking about the decadent and happened in it, so they fired on the phenomenon-name: "chaotic collapse of bee colonies!"

Hossam and nanotechnology!

Rang the school announcing the beginning of the quota, he entered Professor Magdi: Peace be upon you, my children.
And you Peace, sir.

Each year, you are fine, this is the last stake in the school year in science lessons, God willing, see you all next year and you are in the advanced class.

, Boys, we have finished all the lessons of assessments, and this quota share is open, if there is you have any questions related to science, whether inside or outside the curriculum?

Vsktaat breath all pupils, and fell silent for several seconds in the classroom, turned from Magdi seen in all directions, until he finds a student moves or speaks, Fbtzm and said, What ye suffered on, boys?! There is nothing in your head when you ask?!

If; I Sasalkm in science lessons that Stmoha throughout the school year, he lifted his hand Hossam wants to ask permission to speak.

Yes, Husam, you have a question?

Yes, sir, yesterday I saw a documentary on the "technology" space, what this film Hossam O? Was entitled (nanotechnology .. century technology atheist twenty), but I did not come see the movie from the beginning, so I did not understand some of what was said in the film, can you explain to me that the professor and my colleagues what nanotechnology is, and what is its usefulness?

Very beautiful you Hussam, has put forward a new topic in science, a modern clock on the scientific arena, and the main concern for scientists in all

countries of the world, both in developing countries or developed countries, aware of me, my Ohbabi, will tell you the history of nanotechnology, and easier to scientific information; until you receive further information in an easy and soft, do not forget what I say in the future; for you - God willing - the difference T_khassatkm that will graduate from the university, you can apply nanotechnology to any knowledge of applied science, and different aspects of life.

Technology is nano technology, the first leader in the world now and in the future; where they are employed and applied in diverse areas such as: reinforcing and national security, agriculture, food, land reclamation, fertilizers, purification, water purification, distillation and desalination of sea water, production equipment and materials used in the field of new and renewable energy, industry incentives chemicals used in the chemical industry, petroleum refining, manufacturing materials engineering, materials overlapped, spinning and weaving industry, exploration, environmental hazards and handling pollutants, industry hardware and electronic components, communications and information technology, health care and medical tests, and the exploration and treatment of incurable diseases, the pharmaceutical industry, drugs and devices medical, cosmetic industry.

Professor Magdi suddenly remained silent, and looked for pupils, he said: Are you with me? Do you understand what I say?
Individual students with one voice: We are with you, sir, hear you very well.

Hossam said: Since when did this terrible science?
Fbtzm Professor Magdi, Yes, Husam, it is true we are talking first about the applications of nanotechnology before we talk about the beginnings of this science.

On the evening of a cold night of nights winter month of December 1959 established the American Association of Physics celebration was attended by a wide variety of physicists, who came specially to attend the celebration established; in honor of Professor Richard Feynman physicist famous American, who won the Nobel Prize in Physics in 1965 for lifetime achievement Creative inherent in the science of quantum mechanics.

Hussam: What happened in that party, sir?
Magdi: Professor Feynman gave a lecture entitled historical (there are a lot of rooms rock bottom!), Has launched his lecture that first spark to blow up the revolution and the twentieth century atheist.

In this lecture Ohbabi: Feynman predicted can change the properties of any material, and to maximize the features, through the rearrangement of atoms in the form that comes with access to these unique properties and characteristics very different from the original by the restructuring.

Hussam: Is named Professor Ann M. Veneman this technology with nanotechnology?

Magdi: Do not Veneman did not identify this name, but in 1974 the Japanese

title of the world, "Norio Taniguchi," the title of nanotechnology. Majdi and extending his hand to the table in front of him, and held by the writing on the blackboard, and began to write it in English letters (Nan-techn-I-gy), Look, boys, this is the name of nanotechnology in English.

Magdi: Do you know my Ohbabi lengths and units of measure?

Students: Yes, sir, and have started saying, meter - centimeter - millimeter - kilometer.

Magdi: If, boys, you heard the name of the unity of a nanometer?

Students: No, we did not hear it, sir!!

Hussam: Is it a name which is derived from nanotechnology?

Magdi: I already Hossam, Well said, Valenanomitr is a measure of the dimensions of micro-objects such as atoms and molecules of the article, the word "nano" means dwarf in Greek.

Nanometer = one millionth of a millimeter, and wrote on the blackboard: I mean 1×10^{-6} mm; any: 1 millionth of a millimeter.

Hussam: how to take advantage of that technology?

Magdi: A question more than wonderful, each technology a major source of applications, and here is the material Nanonah source of nanotechnology, where scientists capture atoms nanomaterials, and manipulate them to move from their original positions to other sites, then combined with atoms of other substances to form networks of crystal; in order to get materials Nanonah Dimensions distinct properties of high performance.

There is a definition of materials Nanonah, do you want to know?

Students: Yes, sir.

Known materials Nanonah as a group of substances of very small, which is prepared in the lab, or already exist in nature, ranging from measures of length or diameter particle from 0.1 nm to 100 nm, then class of materials Nanonah that do not exceed the standards diameters of 100 nm importance economic superpower, they are more forward Nanonah materials, and widespread and application in the industrial, medical diverse.

Magdi looked for pupils when he asked them: Do you know a thing about Albert Einstein?

One person said: Yes I hear that he was the world, and there cartoon series was seeing on television, called "young Einstein", laughed all the students to their colleague.

Husam pointed with his hand: I know him well, sir, I read a book about his life story, my father bought me last summer in the books Reading for All Festival.

Magdi: Do you, Hussam give us some information about the feat of this world?

Hussam: Certainly, Einstein is a world of physics, was born in Germany to

Jewish parents, and received a dual Swiss and American, is known for Einstein among all physicists as the author of the theory of special relativity and the theory of general relativity, won in 1921 the Nobel Prize in physics.
Magdi: Hossam well done, delivered my son, as you heard your colleague, all you said is true, and that is useful to read and view.

I mentioned to you the name of the physicist and mathematician famous Albert Einstein, we're talking about nanotechnology; because it dealt in part from its practical doctoral thesis for nearly a hundred years how to spread, and the melting of sugar molecules in the water, where he was able to calculate the dimensions of a single molecule of sugar, and found that it does not exceed one nanometer.

Hussam: sir, where is he now?

Magdi: Einstein mean?

Hussam: No, Richard Feynman the founder of nanotechnology, in any country live now?

Magdi: Feynman died in 1988 at the age of seventy years, and Einstein, and he died in 1955.

He raised Magdi his hand; to look at his watch; to know how the rest of the time share, and said: enough of this, boys, one minute, and ending the quota, Do you understand that nanotechnology is - rightly - Technology century atheist century, and the magic key to progress and economic development, based on science and knowledge?

Hammered bell school, do you want anything from me, O Ohbabi?

• No, sir, in the care of God.

A blood transfusion!

She left home early, I went to the bus station, rode the bus bound for my business, passengers come on slowly, left seat is empty, the driver does not want to move only after the completion of all the seats, he suggested one of them afford to rent this seat and we go; so do not be late for our business.

In the middle of the road we started collecting rent, as soon as the driver grabbed the money collected, the beyond:
What is this?! Need a blood transfusion.

Vandest, Anfzaat, my eyes are looking in the faces of passengers, see in all directions, were destroyed around me, what I find anything of this?! Of the patient?!

He looked in the mirror a particular driver in front of him, seen; to know of the liquid, I looked hard, and signed a particular eye, smiled: I'm out as soon as it will go to the hospital.

Of passengers, or are you?

Raised his hand holding a pound paper, I looked at him, I found an old, Malsouka dressing, money, turned around his neck: sir, this is in need of blood transfusion!

Rabbit's new house!

Rabbit has been taking place here and there, looking at this wall, and smell the canals pottery, metal and Mangers, asked her young son:

- Why are you doing so, Mom?!

I looked at him with a smile:

- in order to get to know this place, it is new; to discover good, let us look for your brothers, they wandered amid other young rabbits.

- and how to know them and all the rabbits are similar in shape and color?!
- Come with me, I Saarafhm of smell, that comes from the glands located in the vesicles under capillary fur.

- How will our father, and know our place?!
- through the sense of smell, the smell of urine Bashmh, but my son is a high probability that the farm owner who Achtrana day of the market locked up all the big boys in individual cages; so as not to Ichagroa.

- Even my father?!
- Yes, and you when you grow up you Christbisk other.

- When it?!
- either after Aftamk directly, or when they reach puberty.

- my mother, I see the owner of the farm land in meters measures the amber?
- to determine how you will live while she and her children in amber; so it is

not the place crowded and narrow.

- Ah, so do not quarrel with each breeder.
- fully, you now understand why, let us eat and drink the water, certainly a drug is subject to the receiver, and put our friend; because we are stressed from transport and travel by car.

Little Rabbit was behind his mother until I got to the feedlot, began to eat as he stood looking at them, She turned to him:

- Why stand so do not eat?!
- Is the benefit to eat this food?!
- Of course, you now have reached three weeks of age, we must eat; until ready to wean when they reach five or six weeks depending on your weight and your size at the time, food is prepared makes your stomach to digest food.

After they ate and drank, sat next to the small of his mother, and said to her:

- Can we walk away from this amber?!
- Do you want to run away from it so quickly?!
- Yes.
- walk away if there was a reason.

I looked for him, I felt that it is not understand what you say:

- mean: the mice in the house, or disturbed or attacked us large animals, the farm owner or treated us badly.
- I see the door is not closed amber well, we can easily get out of it.
- This is true, but there can be an external wall, all the wards surrounding the farm, it would be easy to catch us, and we can not escape, punishing us, but our friend imprisonment or slaughter.

Considered the mother of her young son, and I found sleep had fallen, and kept in a deep sleep.

Rabbit drink water!

Entered the house, he asked for his mother, told him his sister as the monsters breeding rabbits, he went to Fugdha put clover green Maalv rabbits, he gave them greeting, tried to kiss her hand but she refused, pretended that she was cleaning cages, rabbits, look in the cage, which stands next to him, did not find water to drink in front of rabbits, Fbdt signs of surprise, he said to himself: It is permissible that my mother raised the pot with water that the potter's cage, he started looking at the rest of the cages, and found it in all of them, and he looked to his mother:

- Mama, you do not proffer the rabbits water to drink?!
- Do not put them with water throughout the winter months.

- Why?! Because the moisture in the winter clover enough rabbits; you do not need water.

- But my mother the prevalent opinion that rabbits should be provided with water in the canals, regardless of the content feed of moisture; so there is no shortage of production due to lack of water.
- Oh and I have, in the summer months makes it imperative to put them on the canals; because the temperature is very high, with a lack of availability of green fodder.

- Try My advice to the provision of water is always in front of rabbits, you will find a clear improvement in public health and productivity, Valeranb could lose all the fat in her body, and half of the protein components of the body and remain alive, but they die when they lose 10 per cent of the water in her body.

At that moment his sister entered them shout:

- O my mother, my Ahmed, where are you?! I Antzertkma that Tatia, but you

Takhratma much.

Her mother responded by:

- Come, hear the words of your brother, he says, it should be placed canals of rabbits drink and they eat clover.

His sister looked at him as if a bucket of water had poured out, lifted her shoulder very surprised declared:

- O Ahmed, throughout our lives we raise rabbits without drinking water taken up during the green clover, they do not drink, but only in summer, water is necessary in the winter Kalsif?
- Water is the most important components of the body cells of the rabbit.

Faqatath:

-) We made from water every living thing (the prophets: 30].
- sincerity of his creation, Without water you can not digest food; and the secretion of harmful substances from the body with the urine depends mainly on the availability of water body, do you know how much represents the amount of water obtained by the body when digesting rabbit feed and extraction of water in it?

Consider taking to his mother and his sister sometimes at other times, waiting for their response to his question, one of them did not move a finger, smiled a smile light:

- is a (10%) of the daily requirement of drinking water, and by the way must be acquainted important piece of information: rabbits need in the first months of life is greater than the amount needed rabbits that can bear the lack of drinking water, while rabbits are affected by rapidly developing.

Ahmed looked in the eye of his mother, and found the two confused like you want to ask for something and do not want, he said to her:

- What Hristirk and is going on in your head?
- Well I have, what is the amount of water that should we provide specifically for rabbits; so as not to increase or Nnqs?
- Do not advise you to drink quantities of specific rabbit; are mixed so far, but it is recommended always to provide drinking water in the canals continuously before; to drink is what you need them depending on culture conditions, without affecting their growth or production.

Said his sister:

- means that there are no specific figures for those needs?
- The amount of water on the size of the rabbit, age, temperature and humidity of the atmosphere of a barn rabbits, for example, rabbit-type New Zealand White drink about (200 cm³) of water a day, while the rabbit Buskat White needs (250-350 cm³) per day, a female weighing (4.5 - 5.5 kg), and their

young at the age of seven (8) weeks - consume about (4) liters of water a day.

Asked the mother of his sister to go to the kitchen quickly and comes with a knife; even slaughtered rabbits for Ahmed, and Vzbanh Tboukth with mallow, is his favorite dish, the whole family sat around a table for lunch, I asked his mother:

- What do you think of rabbits, and mallow?!
- very beautiful, O my mother, your hands receive, but the next time will be better when the rabbits drink water.

Tree cleaner environment!

Entered the poultry farm, accompanied by my friend, the brother of the owner, was next to the farm there are piles of chicken manure, with a pungent odor, and when he felt the owner of the farm Ptdhaiqi, and saw that my eyes fall on the pile, he asked me:

◆ Did you notice anything?!

I looked at him with amazement, confused:

◆ No, I just see piles of Splh poultry.

He smiled a beautiful smile, shook his head:

◆ Have you noticed any insect in place?!

◆ true, actually, I have not seen a single insect in place, despite the presence of such quantities ElaKiri!!

He pointed with his hand to the high number of trees:

◆ The reason that these trees.

◆ What's her name?!

◆ tree (neem), had brought with me from India, when I attended an agricultural exhibition there, planted on my farm, to prevent the insects!

The visit ended, but remained a tree in my mind, has thoughts came to me, I sat down looking for it in the international information network, that reached to the data says it is a tree with many uses, whether medical, or pest control, and in combating environmental pollution, to the extent that there of feed used

by the crop.

I knew that there was an agricultural engineer called al-Husseini, was able to grow and produce in a commercial way, and displayed in many exhibitions of agricultural Kstlat for a nominal fee.

Allah wills, two days after I got that information, that is in the hands of an article published in the Official Gazette by the Engineer, entitled "neem trees in the service environment", I felt a strange feeling, dominated by happiness, I felt at the time that there is a philosophy of Providence wants to tell me more about that tree, Vhaddtna my heart that the good, has eyes to read the article binge too, I knew that they bear the harmful gases; where it has a high capacity to withstand pollution resulting from the gas first, carbon dioxide, and sulfur dioxide, and over the oxides of nitrogen, and these gases are produced from vehicle exhausts and factories, it has some of the scientists using tree extracts (neem) in the expulsion and the prevention of insect related to the human and animal health, such as mosquitoes and house flies, cockroaches and more!

I said to myself:

◆ Praise be to God, and finally found a way to get rid of the insects that fill the manufacturers for recycling of waste, in order to protect workers and the villagers around him.

Injected birds!

Rang the mobile phone, brought him out of his pocket, Re peace, liquid Speaker:

- Are you Dr Abdul Aziz?
- Yes, you?

- Alhaji Hosni with you, mayor of the village dead horse, I lived a poultry farm since the affordable, whenever you add any drugs in drinking water or feed, the result does not come effective, increasing mortality rate, a friend showed it to you, where you said: You are an excellent veterinarian.
- O pardon Mr. Mayor, Akram God, this is your taste.

- Is the time is right now? Or close and speak to you at another time?
- No, no, please.

- Doctor, is there another way to give medicine other than birds eating and drinking?
- Of course, O pilgrim Hosni, you can give medication by injection.

- injection! How so?
- either under the skin, or into a muscle.

- What if the cases that require medication given by injection?
- Q wonderful pilgrim, injected birds with medicine when they are weak and unable to eat or drink, or when the required account dosage accurately, or when required prompt treatment, or when it is required is the absorption speed of the drug, or when the required upgrade drug concentration in the blood to very high degree, can not be accessed when a drug is given by eating or drinking.

- "God enlighten you, O Doctor," there is another question, sorry, you will be

heavier.

- I prefer Mr. Mayor, I'm under your command.
- Is the method of injection into a muscle or under the skin to have the same effect on birds?
- Of course not, the impact of injection into the muscle faster than injection under the skin; because the medicine is absorbed directly by the blood vessels deployed in the muscles, it is important to be on medication as a liquid aqueous or oily.
- injection under the skin to be in any place the body of the bird?
- not in any place, but is injection under the skin of the neck, pull the skin up, then push the needle injection under the skin in the upper third, of the neck, to be in the direction of the needle body of the bird.
- Cherg very beautiful Doctor Aziz, I feel as if I see you and you injected birds in front of my eyes, then this is for injection under the skin.

Before it completes, interrupted by Abdul Aziz said:

- sure you want to know how is the injection into a muscle?
- Vgahgah mayor, voice rose smile, laughed Dr. on the other side, then the mayor said:
- We will not forget Doctor, Fahadatk reserved.
- Individual Abdulaziz in anxious:
- Do not get me wrong, O Mr. Mayor, Lord help us all, and perpetuates known among us.
 - God willing, be good to know Doctor, go back to talk about the injection into a muscle; so as not to prolong you talk.

- The injection either in the groin or chest, taking into account that the injection is in the outside of the thigh, taking care of injections in the inside so as not to coincide with a needle by blood vessels, or nerves that spread into the interior.
- This is for the thigh muscle.
- True, but for the injection of muscle chest, you should use a short, thick needle, the injection in the upper third of the chest in a place parallel to the greatness of the cage, with the direction of the needle vertically.

Interrupted the mayor:

- Sorry, Doctor, sorry to interrupt, but I have a question here, I told you: in the upper third of the chest muscle, if the event was injection into the lower third?
- they should beware of injections in the lower third, or change the direction of the needle; fear of penetration of the abdominal wall to the liver, leading to the death of the bird immediately, generally more commonly used drugs by injection is antibiotics.

Dr. Abdul Aziz thanked the Mayor, the phone call ended with the promise of this veterinarian visit a farm village in the new mayor as soon as possible, it will be their phone to determine the date.

The cow was born!!

Cow has been "Thzq" between Onah and another, their feet hit the ground, shaking its tail, looking at the back, has been on this case throughout the night.

In the morning:

Started coming from, "greeted" secretion "throw" stinking; which upset its neighbors in the barns adjacent and opposite to her room on the farm, came with two cows of them, entered the Fujdtaha very nervous, and when he seen the calf infant beside her, Arafta she was born at night, she said, one to the other:

- Oh, was born late at night, you can not remove fetal membranes from her womb; because they are weak and poor; is the first time carry and give birth.
- This can be certain that the birth was difficult, or event twice and the disruption of the uterine contractions.

She called them the cow, which suffer from severe fatigue and exhaustion:

- Ttrkane talking together and so on!

Valtvta Tsalanha to:

- Have you had warm liquids after the situation?
- Do not touch anything, but I smell a very unpleasant, I do not know why, I'm afraid to be one of the small calves.

I replied:

- Do not be afraid, because of the long retention of the placenta in the womb, I began to decompose.

The second of which came near and put her head on her body:

- increased the temperature of your body.
- Come Nsafha; because they will get poisoned.

Cried the cow tired:

- going to die.

- calm down, did not take long at birth, fear if he went 48 hours, Delays cause constriction of the cervix, and can not be directed by the placenta.

Fterktaha, exited, went first and started looking at the feed store for soybean grain did not find, but found the barley grain, so she boil, boiled came to bear this and put it to them to drink.

The second one, I brought the farm of Pharmacy, has injected under the skin.

I asked her the second:

- Why Thakninha? Enough boiled barley.
- an increase in injection prudence; to help them on the activity of uterine contractions.
- This injection Alheibovizin?
- Do not find it, it is an injection of 5 cm 3 of the Obostrh.
- Where the veterinarian?
- will come off, is the one who gave me the injection, I was asked to inject up.

Minutes and they entered a great veterinarians, the largest bulls male farm, he immediately remove the dirt and the remains of dung leech Balehia and Almnaam, by antiseptic solution "potassium permanganate 1: 2000", then cleared his hands and arms carefully and Dhenhma Vaseline ointment, enter his hand with the utmost kindness in the womb, and concluded that the membranes of the uterine Filvat one after the other.

One of the cows began to approach him; to help him in the clouds, he said to her:

- attraction without violence, caution; so as not to rupture of the uterus, or severe bleeding occurs.

After that make sure the integrity of the membranes and not torn apart, or leave part of it inside the uterus, uterine washing solution in the same purgatory, who was purified by hand, paying for Bose Alantozon inside the uterus, and then said to the cows Almaaontin:

- injected into a muscle for three days 5 cm 3 a vitamin D 3 e.
- fully Doctor, is there any other instructions?
- Tracpinha, and Take on the temperature from time to time, noting the case of uterine secretion.
- What we offer them food and drink?
- Must be clean, easy to digest food, and provide green fodder with concentrate feed; to strengthen the livestock, as well as minerals and amino acids.

Hodhod cow doctor with a smile:

- Thank God for your safety, see you tomorrow - God willing.

Bodies of the dead!!

Yassin returned from his trip, he began a visit to the people of his village, during Boutrqat toured the village, came to the house of his aunt is in a deplorable state, which felt very upset, I noticed on his face signs of grief, I asked him immediately:

- What happened to you?
- there will be a disaster and epidemic in the village.

Gasped a deep gasp, struck her hand on her chest, her face red:

- a disaster, why?
- People are throwing their animals dead in the streets and canals, banks, and on a pile of ElaKiri (bogs).
- Yes, what do they do with those bodies? They are over the age of the case.
- This is a very grave error, what a disaster by all means a sense of the word.

At that moment his aunt's husband went out of his room, delivers on Yassin and welcome, Vtdakhal with him in the talk that was going on between him and his aunt:

- O Yassin, and I have, which I learned at the College of Veterinary Medicine thing, and the reality faced by people something else, I for example know the owners of farms for breeding and cultivation of fish in the pond, looking for those dead animals everywhere; to be a food delicacy of the fish as a source of protein ; to increase their growth rates.

Hit Yassin CVA on a palm, looks around left and right:

- There is no power but from God Almighty, what is this fraud and greed?! Are these human beings?!

Replied the man his aunt:

- Do not be surprised so, but the means of the die has a cow or a buffalo,

what to do with it? Bury her?

- Yes, bury or burn, you should when you move the animal to get rid of it by burning or burial to take precautions to prevent contamination of the roads.

Aunt: I mean what do we do the body?

- before putting the body on the bandwagon of transport must be dam outlets body, Kalonf, mouth and anus so as not to leak Soaúlha and content, covering the body with pieces of burlap moistened with an antiseptic solution.

Interrupted his aunt's husband:

- Kalphenak for example?

- No, preferably raw and not diluted, and the process of burning or burial in a place far from the houses and barns, canals and drains, fields, then we must purge cart well.

Aunt brought in that moment, cups of tea from the kitchen, I looked to her nephew:

- prefer Doctor Yassin, Thyme tea you love, I mean: Now that we take the body; so we burn in a remote location, is there anything other than that?

Yassin smiled, puffed and Jntah, shaking his head after he drank the first sip of tea, excited from the words of his aunt and delicious tea:

- your question is very beautiful, O my aunt, you are now really want to recognize it fully and correctly, opt for cremation place in the tribal "under the wind" away from the houses and barns, is digging a hole two meters long and a half, and display meter and a half, and a depth of two meters, is then digging a trench in the bottom of the hole on the shape of a cross, and display the length of the hole, half a meter deep, and the distance between the parallel ribs half a meter too.

He remained silent Yassin for a moment, looking for his aunt and her husband, causing intense they are not Mistoobein what was said about the pit and trench burning, and get out a pen and paper white bag lying next to him on the couch, stretched out his hand to the table in front of him, and began plans for the two craft to burn the bodies of dead, Vaqterpa him looking at when laid down.

And went on to explain:

- Do not need to distribute part of the soil of the trench distributed regularly to the Elements of the bottom four; to be piles Tkoh of rods of steel Ertkzan in the intersection, and put on these two bars the amount of wood, and branches of trees or dry wood, and sprayed diesel or gasoline, ignite into flames.

Looked at his aunt has a spouse understands them look not convinced of this talk, then said to him:

- This method is very stressful, you need to experience a long time, this effort until we burn the body of an animal, it will do all this?

She pointed to her husband with her aunt signal you want silence now, turned her face smiling in the face of Yassin:

- Then the body will burn immediately and expire?
- you, O God Amtah, if you want to speed up the burning process, you can make a small hole adjacent relate to ditch the first hole, the air inside helps to increase the ignition.

Husband Aunt: Well, Dr Yasin, if you want to bury the body and not burning them, what way?

- the work of a deep hole specifications hole burning itself, and covers the bottom with a layer of lime, and then received the corpse, covered with a layer of lime as well, and received the pieces of heavy stones, and then bridge the hole and tamping soil; to become level with the ground nearby.
- Why take the heavy stones before backfilling?
- can not even dogs and wolves be drawn after the burial.

Rang the door bell, I went Aunt; in order to open the door, grabbed Yassin a glass of water, which brought him his aunt with a cup of tea, once you have finished drinking water, which had been was the aunt of at the door of the house holds in her hand a bag full of all etc. grape, smiled Yassin to his aunt:

- O ... You still cultivate grapes, Hussain Nbugm and God.
- I know what you're coming here, I sent you to collect from the grapes.

Faqatahm pair aunt, said:

- There is a final question on this subject.
- prefer.
- Some educators are Bslkh bodies of their animals dead before burial or cremation to take advantage Bjlodha.

Yassin, shouted loudly:

- This is a fatal error, such dead animals certainly were infected with contagious diseases or non-infectious; so you must burn or bury the bodies of animals infected with contagious diseases, and not opened or skinned, you should not happen, only after that decide the vet that mortality is not due to illness contagious, and the risk of skinning.
- Excellent your words, what those infectious diseases that prevent them skinning?
- cholera, rinderpest, foot and mouth disease, and infectious pneumonia, and anthrax, and septicemia, smallpox, diphtheria, rabies, and scabies.

Smallpox dialogue!

Under the "Adam" and "Adme" Aljamilan small children play all day, until the sun set on the pasture, felt that they Mtaban and two patients, Adam the sense that its temperature is high, and "Adme" I felt severe pain in her mouth and her lips, went each to his mother complaining and beer , So I went all the camels to the clinic Algelmd (herd), accompanied by small, in the way they met, Vtgazba to talk to that got us all to the clinic, and found the doctor standing in the clinic, welcomed them, Vgt each and every one of them what pain her son "Adam" and "Adme " .

Approached the good from the "Adam", and asked him to open his mouth, his teeth looked at looking at:

- Ah .. Age of two years.

I asked his mother:

- How do you know the old Doctor?
- of his teeth; Valoniab appear on the upper jaw.

Approached the "Adme" to open her mouth, her mother, saying Vsbakth:

- three-year-old Doctor.
- Yes .. The husband of the first deciduous incisors fell, and sustained them on the back of the jaw, it is necessary to know the equation Sunni; Taatarafa until the age of Sgarkm.

Doctor's examination of the skin of the body small, then went quiet after the expiry of the disclosure, or I asked him, "Adme" eagerly:

- What their Doctor?!

He looked out from under them (glasses) very quietly:

- are afflicted chickenpox camels.

Mother replied, "Adam":

- Where Jaehma this disease?!
- It affects the young camels of two to three years, do not be afraid; Valsgar heal it, and build immunity against him throughout her life, do not get it again.
- Akon from the pasture?!
- is shared between humans and animals, this disease has emerged in Kenya as a disease common among animals and humans; a result of drinking some

individuals to us from infected animals, which showed their sores in the mouth and lips.

- never mean that he has moved the children of herders and milkers?
- This is very permissible; It is transmitted by direct contact.
- Is the infection will move us?
- camels often get smallpox before it reaches the three.
- What symptoms?
- vary the incubation period of the disease among 4 to 15 days, starting after the disease in the form of mild fever, showing pustules on the mucous membrane of the lips, and the sentences Bdek lips to relieve them, leading to difficulty in eating, disease affects sometimes the udder, and around the anus, and thighs, and feet.
- The treatment is now Doctor?!
- itching of the skin, causing superficial wounds, and deal with them.

Locked indulge!!

The writes and writes, that came to him the hair where the inability to write a single line, or write and delete, seems to be able to write something pleases him does not deserve the write-off, was really a gnawing feeling that he was inspired, he started looking in the library to read anything from those phenomenon, is experienced by one of the book before?! Or is he alone who was it? Did not find any book that has talking about it.

Under such does not write and if books removed, until the day he read an article in his magazine preferred the title "circuiting writer!", Astonished too, sat throughout the whole night, whenever dived his body on the bed to sleep, he sat down and grabbed the magazine to read again and again, Fastikzt his wife , I found him putting his head in one of the pages of the magazine, she said his voice Maktoum, seems to be the impact of sleep:

- What's your, what the magazine does not make you sleep the night?!

He raised his head to look with joy, his eyes flashing:

- Thankfully, Atmonnt to myself, there is the book happened to them circuiting.

- circuiting ...?!
- Sit read to you part of the article.

I sat on the seat opposite him, wore glasses to see well, wait until I feel it is attentive to him, says the author of the article:

"Examples of the famous Agaflat the book what happened to John Steinbeck while writing the novel Of Mice And Men, which lasted from about 10 years! Like Alagaflh that occurred to Stephen King, while writing The Green Mile, The cross-Stephen King on the subject of Alagaflh written in story Secret Window, which tells the the writer is suffering from this thread can not write, as long as there are cases where Alagaflh many years on the unusual, for example, wounded by Henry Roth (1906 - 1995) written Bagaflh lasted about 60 years! but fortunately this is still rare. "

When he finished reading that paragraph, he lifted his head:

- What do you think?
- very beautiful, is not the article mention how to decode those Alagafih?
- Yes, male, such as determining the time dedicated to writing, regardless of the quality of the writing that is produced, or the allocation of time for writing or free writing thoughts, said, for example, a literary doctrine of the real from the literati of France that he was wandering in the streets of Paris and in his pocket a small notebook and pen, Whenever he found a scene in the street, or listen to the dialogue in the Council, or in the (bus), or in a queue, or to draw attention as one of the characters: a woman or a child or a man, record description of the personal, perhaps drawing the most important features if he could to this way, if returned to his home evening the heart of his diary pages, try to invent Association, issues and positions between these characters, and thus formed in the stories.

Laughed his wife, and he looked look to rage; she said immediately:

- Do not get me wrong, you would do such a French writer, graduate of the house (damage and spin) on the streets and roads looking for an idea.
- Do not you (advising smart), but Sajma stories of sitting daily at the cafe, instead of chatting without interest, will record what I hear of stories and tales in my mind, I try to identify the headings only; because I can not write many in front of them so do not complain about it .
- the idea of a very beautiful, come on, type, closer to bankruptcy.
- God.

Days passed, weeks been a week, come down to spend half a day in the cafe, it comes and sits on his desk holding a pen filled with dozens of white papers, and then formulates what he wrote on the computer until He fell asleep, Vistikz to go to the cafe again.

Passed several months and not new, had to be owes a sum of money, until the day his telephone rang, the call for laughs with the interlocutor, the fire eat the wife, she says to herself:

- What Adgh like this? O Lord, be good.

Ended the call, overwhelming happiness filled his face:

- spaced .. Spaced!!
- What's up?
- You are over the past months, you say to yourself: Why does this man, not up to anything?! This phone of the owner of the largest publishing house, he wants to collect stories that I wrote, and published on my blog on the Internet in a book, I will pay a very large sum I did not expect, then praise be to Allah, Lord of the Worlds.

Even the coin!

Arrived to replace the grocer, began to choose the boxes that I want yogurt, and presented to the seller, Fdha according to the price, and then said: Six and a half pounds.

She brought out of my pocket and banknotes worth ten pounds, Vkdmta him, grabbed, and then gave me the rest, and was three and a half pounds coins.

I said, in a few months will become the currency of each category of one pound and a half pounds, all metal, the central bank has already begun to withdraw paper currency and replaced by another metal, and generally people began to get used it.

He said: I read an article in the newspaper a few days ago to say that China will produce these coins!

Vgahgaht voice filled with laughter, and I said: God will be cheap!

He said: I mean the pound price will be how much?!

She smiled and grabbed the bag: China has not and will not leave anything except that manufactured ...!

Conditional marriage!!

O'clock noon.

Over time.

Staff went out of the company's headquarters, but (a Omr) is still in front of (computer) speaks with his wife on the Internet.

Security Supervisor came in the company:

Come on, sir, it is necessary to close the company now.

Well, one minute please, I will finish my speech, and close the computer, and sent down immediately.

Went to the elevator, pressed the button asks, reached the elevator, his income, and found inside a man standing:

- Peace upon you.
- and you Peace.

The man began to draw the Omr of speech:

- sir, may I ask you service?

He smiled Omr and exclamation signs look exactly the same:

- With pleasure, Why do you ask?
- Can you come down with me to the second floor; bear witness to the marriage contract, Valmodhun waiting for me, and I'm looking for a second witness!
- Mubarak, come on us.
- very sorry, Saatlk ten minutes, I know you finished your work, and now you want to go to your home.
- Do not you, O bride, a beautiful thing to the marriage certificate, Fetwabh great, God willing.

Opened the door of the elevator, the groom said: Come on sir, may we, this is the apartment .. I do not recognize your name on the Quran.

- My name is Omr.
- I am your brother Abdullah.
- I had the honor to know you.

Went out together, he turned to the man Omr:

- Do you have your identity?
- Yes .. Yes, my identity.
- Very nice, thank God.

Abdullah raised his hand pushing a button bell of the apartment, opened the door a little boy:

- hello to you, please.

Abdullah pointed to the Omr:

- prefer to enter, the home of your house, you, O peace group.

Individual all those present:

- and you Peace, delayed us, O Abdullah, Where were you?
- I was looking for a second witness.

He looked to the authorized Omr, stretched out his hand:

- your identity as possible sir Omr; to prove its securities.

He thrust his hand in his pocket Omr, and took out his wallet, and held identity, and given to the authorized, authorized began to fill in the data second witness in the marriage certificate.

He was sitting next to him, the father and the mother of the bride and the first witness, and that little boy who opened the door.

Finished writing the authorized data Omr, gave him his identity:

- prefer to Professor Omr, always serve you in the delights.
- honoring you God!

Turned his head toward the bride authorized, which was sitting on the opposite side of the Omr:

- My child, my lady brides, do you have any conditions like to write them in the marriage contract?

Paused for a bit, and consider the same in all directions:

- Yes, to me the conditions!!

Everyone remained silent and concealed their breath to see, waiting for what you say:

- Lee three conditions:

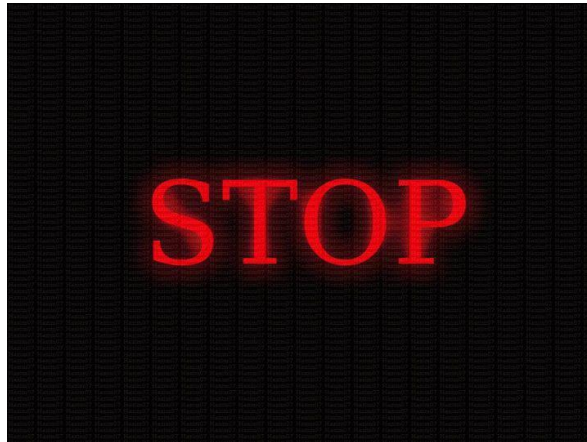

The first to complete university education, nor prevent me from getting my degree.

The second allows me to ride and drive a car, then fell silent again!

Said authorized:

- What is the third condition?
- not to prevent me from visiting my family?
- What do you think my years in those conditions?
- I agree to all the three conditions.

Renegade!

Graduated from the University, he received a Bachelor of Engineering mechanization of agricultural machinery, began looking for work, which has been transmitted from work to work, and one job to job, working workshop lathe was soon left, go to the factory for the manufacture of agricultural machinery, did not stay by only one year, Then he left, he is young rebel on the situation, does not want to work for others, all have the thinking is to have his own, arrived in his rebellion to his family, was not heard of any advice from his father, to the extent that its relationship with him and to the extent that they do not mix together in the house at one time!

With this rebellion in this state, passed year after year did nothing to be proud of, that came - days - his father entered his room, sat down in front of him seen, a deep sigh Tnhada:

Oh and I have, I taught you to be graduated at the university, where I worked in the work does not last a long time, Now I may offer my age, married sisters, daughters, not only remains for you, I want to assure you, you've saved one hundred thousand pounds to getting married, take them and start your life the way you like, I will not be any power over you from that moment.

This surprised the rebel of talk which he heard, and did not utter a single word, not believing that his father will do what he said.

But did not pass the week and one hundred thousand in his hands, he felt scared and confused, his mind and stopped like a small child, has learned nothing in his life, began to ask everybody you know:
- What do I do with this amount? Where do I start?

This advise him, and this suggests it, under this situation for several months, as provided by step, came back two steps, fear of failure is owned by, afraid to put this money in the project Vijsrh, until the day led him a friend when that join in one of the maritime academies, taking advice, and joined the Academy in that; for complementary studies, six months, after graduating officers to mechanical maintenance and repair of naval vessels.

And God forbid him well, in the second month of the session announced the Academy of the existence of an international competition in Britain for welding under water, inviting students to participate, providing this renegade administration Academy request to participate the competition, within a few days completed the academic procedures traveling, he entered the competition, there has been seventh place, the center of 112 participants from different countries, on the distribution of prizes to the winners give it a people, knew himself, he was offered a contract to work in the welding oil pipelines in the Red Sea, the oil company global, and readily agreed, and signed his contract, he traveled directly from Britain to the work site, despite the seriousness of the work, every time immerses be subject to death, but his life changed completely, reversed his position on its head, shall receive a monthly salary of an estimated ten thousand dollars, working two and taking a rest month, before going through it the first year was going to perform Umrah, Hajj and then the following year, bought a new car, he was offered a large land brokers in the best place in the city, and built upon Vastraha luxury house, for He has caused God to choose a life partner.

Do you call poverty?!

I was sitting with my teacher at the university, we entered one of his pupils holding a book in her hand, handed over to the professor, invited her to sit down and I sat on the seat opposite me, I smiled at her as a kind of peace without a handshake, he started the dialogue with the professor runs:

- How are you today?
- Thank God my doctor, I have a very important question Chglna, so I decided to come to you to answer me on it.
- Welcome, Go ahead, good.

- Is it true that Islam calls for poverty?

What was only me and Mr. utter astonishment and puzzlement, raising his eyebrows, Dr., the pronunciation of my tongue and tongue one word, at the moment of lightning:

- What?! Poverty?!

I remained silent, and went on Professor:

- Who told you that?!

She raised her hand shake by the salinity of the book:

- I read in this book.

Stretched out his hand holding him, once you have signed the same on the cover:

- Ah, the book "Islam in Uzbekistan," an old book, published in 1960. Vhrki my head, shined my eyes, my eyes took place in the eye of my teacher, he smiled and said:
- Communist Party during the Soviet rule of the Republic of Uzbekistan.
- Your words exactly right, written by a woman named "Skharōh."

All of this sitting and Her question did not pronounce a word, but watch and hear the talk show with our teacher shared, he turned to his pupil Dr:

- Where did you get this book?!
- purchased and another set of books from the booksellers, the old one, a few days ago, Vshidna address, read it first started, I found him full of appeals cruel and false slanders on Islam, in faith and acts of worship and social system.

I pointed to it:

- Will stating that Islam calls for poverty?!

Professor replied:

- Yes, the author stating that Islam is based on fate and destiny; where much is that stamp on the poor to poverty, and wanted him to be as well.

Completing a student as well as the author has said:

- and the Bolshevik Revolution in 1917 that saved the country from reactionary religion, and eliminated the customs and traditions that are lost time and tempted to laziness.

Vtnedt, take a deep breath:

- This calumny, all because of communism and atheism, I am God and to Him we return.

I went the pond!

He wakes up early, not late in his sleep, he remained throughout his life, loves waking up early, his mother was saying: "Bakor in the pond," he hears in his ear as he entered the bedtime, the people around him wake up early, if he wanted to buy something from grocer, Vabakalon open in the sixth, and if he wants something from the library, Libraries are open from seven, his father was always reminded him of the English similarly: "early to bed early to wake up."

After that went to the pension, is no longer wake up early, found it a waste of time, the Libraries are not open before one in the afternoon, the car repair is not possible before noon, if he wanted to spend a transaction in one of the government bureaucracy, it is not before eleven in the morning.

His son came back from America, after receiving his doctorate, came out of the door of the apartment, in front of the apartment and found the garbage not lifted, and he looked Bassaath, exceeded the twelfth in the morning, he returned to his father retired, asked him surprised:

- ◆ When flying the garbage?
- ◆ does not come from only brought near the back.
- ◆ Does this make sense?!
- ◆ because it eliminates-evening to watch satellite TV!
- ◆ There is a reputation in America: "The early bird gets all the worms."
- ◆ this example we have is wrong, in which case the worms do not wake up before one in the afternoon!

Ratified after a while!

Entered the lab, delivered to my colleagues, held the portfolios, threw them on the desk in front of me, opened up - although I will not remove them or put anything inside them - noted that there are hidden hands tampered with, Vtmaket my temper, so do not make any tension in front of them, pretending that I'm looking for the thing, where I search began quietly, confirmed that these malicious hands were looking for something, and did not find it!

All contents of the bag full, but change their order, took a deep breath, and praise God in myself, there is the wisdom of what Jhtna to open it and I know what happened to them, closed down, smiled at them smile rage, went out quickly, my mind strewn thoughts, questions are sent from the mind of the heart, Do you walk so as not to be late? The end always looking for the biggest colleague told him in charge of the lab? Oktm issue in my chest? I stand for a moment? I move a little? Uncertainty has paralyzed my thinking, not out of solution, Fastkhrt God in seconds, the matter can only be "yes or no" and immediately, he said my tongue in order to hear my heart:

- You will not miss this pass unnoticed, I will look for, told him what had happened, I am not mistaken in one.

I asked him, I knew that in vitro the Great, is preparing for a new experience, I entered it, and found his right arm stood beside him, help him, I threw off peace be upon them, and stood a minute silent, I think, and I arrange to speak in my head, afraid to utter a word calculated to see them and looking at me with great surprise , waiting to say something, I pointed to my hand, sweat falling from my face:

- Doctor, possible word in private, please?
- With pleasure.

Leave what he was doing, apologized to his assistant, we came out of the lab, began to talk tell him in a whisper what happened to the bag, stressing that it has not disappeared, including one thing, attributed the news to him about it; because it is responsible for this lab, and what was happening inside, all

colleagues daily put their belongings in the early hours, then return to it at the end.

Hear me with all the attention, and then said:

- Do you accuse anyone of this action?
- There are two always they are together during the noon prayer, all go to mosque to pray the lab, and Agleghan door to the lab themselves, but I do not assert that they committed this act.

Did not comment on what I said, I asked him: Do you ask me something now? Left him, was launched, there were always Anasrafa in the book, all the way home I think about what was their purpose?!

Days passed and I forgot it, but I no longer leave my bag in this place; for fear of a repeat of what happened.

In a few days after the incident several months ago to leave work, I was approached by this plugin, without warning:

- Remember what has happened since about three months, I came and I said so and so ...?

I looked at him with surprise and confusion, I say to myself: surely Dr told him what I said, very quietly replied, you do not learn from his goal to open this subject again, I raised my head, look in his face, he is tall:

- Yes, I remember, is there new about this topic?
- Frankly, that day, did not believe you, he told me it was one point about the word.

I looked at him, my head burning, how can he say this? Why do I say to him? How should I respond? Passed those Keldahr seconds, his face smiling, and my face sullen, I left my silence:

- What made you speak to me in this matter after that period?
- Two days ago, an incident occurred, confirm the truth of your words, your advice has reminded us that the day notice of what is happening inside the lab.
- What happened? Say, tell me ...
- You are leaving the portfolio of documents inside the factory to the end-time as usual, was the original graduation certificate my own, disappeared from the clipboard as soon as I told Dr. theft, hit his head: Ah, that's what he said, did not believe him at the time, probably mispronounce it.

If it is complaining?!

Whenever a step came from the spoil him joy, if it helps anyone, or excel in everything to his work, he wrote a complaint up to manage the work, the more accomplished achievement came words such as lead written by a cold, every step finds a few days after but a few hours on the White Paper underlined, By Dry Green, line patch, amazing details of the details, it is where he came by his cold-blooded?! Does not know! The same happens: "I wrote in which I am," Does this make sense?! OoKetb complaint to myself again?! If it is, who told him all the same Otnevsh, Faadh Ali? As well as my routines, Sknati, every time you reach a complaint referred by the Director-General of the line manager; to achieve it, that and its relevance to the paper with the words reflect the feelings of hatred, hatred of Devin is clear from the owner of those bombs towards me; prompting the Director-General to write the words: uncertain that this A complaint from friends or colleagues very close to the moaned against him, and advise him Vhdhirh, so pay attention to him and warned him to take, they are definitely malicious complaints intended to harm him in any way.

All that he does not know of written, still thinking about, all around him are all outside the scope of suspicion and above reproach, an excellent relationship with everyone, if it is followed?! Olat without being accompanied by feel?! Turned his life to the nightmare of his complaints, so much so that as the income of the workplace, wait to call him the director and pay in the face sheet or several sheets carries the words, a new the condemnation of him, until he became a famous center of his colleagues and acquaintances to work with "complained against him," to The day that someone called him and asked to talk to him in private, asked him:
Does complaints ♦ dates and numbers?!

Looked at him and glanced at his face and his mouth half open slot, repeat it the question:

- ◆ Are the numbers and dates.
- ◆ Ah .. Yes .. It ..!

He smiled a smile of his Almtakd:

- ◆ There is one person uses this method in writing to complaints!
- ◆ never mean numbers and dates?!
- ◆ Yes.

◆ Is it known to this degree?!

◆ certainly Since we knew he complains the whole world; where that if he heard any number or date for anything that keeps it on the spot, Echtzelh then written in the book of special hidden in his bedroom, and then connects after several dates or numbers in a single complaint, After a week or months or years; making the complaint is strong and of great value when reached by the officials who supported the complaint statistics!

- ◆ This seriously thinking of someone who is not easy at all, is he?!
- ◆ Wael.

◆ Oh man, how is this?! This is precisely the person between me and him a very good relationship, it was not us in any one day bad, it is precisely another human being in the universe, I think - just think - that I doubt it!

◆ securities in which the complaints are, go back to it and Dahha his plan in a paper by any specific action, it will not cost anything.

Came down to him to talk like a mountain collapsed over his head, he could not utter a single word is out on his advice, dear, that can decrypt the mystery that puzzled more than two months, he went to his house and his mind by the revolution, thinking in accusing Wael his books complaints which, could not sleep all night, Jaffna did not sleep, he arose, and did wudoo 'and prayed, then remember the position took place in the house of Wael, remember talk that took place between them, told him the secret of a certain not hear others, and did not see them but Allah - the Almighty - came complaint after the incident two days only bear exactly what happened between them, so it was faster to write the complaint.

The next morning, he went in the early hours to an employee Archive ask him any papers the manuscript, however, Wael, but he refused at first, whispered in his ear that this might give him a ride to those who write the complaints, so he immediately remove the files of the shelves, has been looking where until it reached a memorandum by the full line Wael, once signed an eye on his plan, he said:

◆ Praise be to Allah, Lord of the Worlds.

◆ Archive officer asks him:

◆ Is it?!

Brought out his bag of photographs, which wrote in his complaints:

◆ See and compare this and that!

◆ Yes, indeed, this line is this, does not require expert lines, congratulations;
God has shown the truth.

Buried Balosth!! (Buried through the medium!!)

Hours behind the hour, time is running out, see the wall clock times, and sometimes at the hour of my mobile phone, enter the kitchen to my mother:

- Do Klmk?!
- No, I will not talk to him, should he speaks it is!
- Actually, I'm afraid I occupy talk to him about what is in it.
- Overall, our Lord and help him pass the test, I said to him: If not successful, do not be sad.
- I also spoke with him yesterday to speak himself.

Completed the preparation of lunch, I went is to pray 'Asr, which authorized him while attending a kitchen, so I went and sat in front of the computer was browsing through some sites until he came, hunger began to intensify, but my mind is happening my stomach: the patient, Vokhi access, no longer be delayed more than that, I heard the door open outside of the house, it is a way to open the door to understand what had happened to him, we met at the door of the apartment laughter:

- Sure I failed?!
- Of course I failed, the children ...

Under the slanders them and curse them and the computer.

- What caused the computer, to test Oersbt computer?!
- Yes, even though I answered all the questions correctly!

- Ok, so why if I fail?!
- I remembered the words of my friend, who entered the test for several months; where he said to me: If I entered and sat down on any machine on the right, you'll deposition, and will not succeed no matter what your answer!

- Why the right hand?!
- Because these devices are programmed to give ratios less than required for success, even though I answered by 100%.
- Do they not relate to through the medium, that you are attending a two weeks ago?
- Yes, I spoke more than one person, all of them assured me that they spoke with the officers supervising the test computer, and then test drive the actual car.
- What happened as long as they and those Soi you?!
- I called them after the test, did not believe what I say, imagine I was joking with them, they asked me: How do you engineer and deposition of specialty cars, and you are an expert in the repair and maintenance of computer?!
- swore to them that this happened, they asked me to finish the call with them, and will leodon contact me again after a few minutes ...
- contact?!
- Of course, they told me that they will determine a date to me soon, after a week or ten days to enter this test again, Faqanonaa not enter this test fails it except after at least three months ...

Exclaims the top of his voice, the first time I feel the injustice, this is not a country, even (zucchini) and medium Khzltna!

I said to him: Calm down, my brother, it is imperative that Trude yourself on the injustice and oppression, do not remember (zucchini) on your tongue, kilogram of tomatoes arrived ten pounds, and in some provinces arrived fifteen pounds, (zucchini) you need to (tomato sauce)!

Faqatatna Mom: leave out the shipment inside; to calm down and relax, which is in it.

- Keep your temper in a refrigerator; to live in peace in this country, you are now waiting for that dream job two years ago!
- Do not, then do not, you will not live here, I will leave and work anywhere in the world.
- Come on, my mother put the food, my stomach Fsafar Tzkzk.

We sat around the table, his tongue can not remain silent, even under tells finished lunch, I remembered something important, I said to myself: I have to tell him it; silent until he is convinced, I turned to him:

- My brother, will continue looking for a mode and favoritism, and pay bribes, even after dying and becoming one of the afterlife!

He looked at me Almgsh he and said: How do I pay a bribe and I'm dead?!

- You are your soul's companion stepped up, your family wants to Advinok ... Before I, rang his mobile phone, Vastaznni to respond to his friend, I pointed to it: that the response of it, began to tell the interlocutor on the other side of the call what happened to him in the management of issuing driving licenses,

after the completion of the story of what happened to him today, Under the call ended up laughing!

I asked his mother:

- What was Adgk like this? No longer sad what happened to you!
- Do not, my friend Ali cut now that was once a gold extracted his license, he was with him, and mode, and sat in front of the computer answer alone!

• alone?!

- Yes, alone, did not touch any of the mouse or keyboard, within minutes of sitting emerged as a successful test result by one hundred per cent.

Gahgahna all, my mother, she said:

- Avhmt now how you answered, and I fail?! Medium only thee, but the next time to see you soon, you will get it without testing.

Turned round to me:

- did not complete me, a person dies and he wants his family to bury him, what's the problem?!
- Ah, the burial needs a permit.
- properly.
- a family member goes personal identity of the Office of Health's his home; permission to extract the burial of it.
- There must be declared.
- Health Unit are asked to doctor a sum of money, if not paid, you will not take the statement, and Go is the body to the morgue; for an autopsy before burial; to write a statement of causes of death, may have died because of criminal, or cutting Valdf, whichever you choose?!
- payment, I am God and to Him we return.

Hasd prizes!

He read the news and is transmitted between the intensity of links to electronic news establishing a new party, youth, and the convening of its first founding, open the browser has been read to that reached in which to: Participated Egyptian poet Young (a. H), which won this year, many awards, and delivered a poem of the Revolution of January 25 on the establishment of the party, stop reading the news; remember on the spot, sitting by bus taking him to Cairo to receive award task won, his friend the poet is sitting next to him talking about literary contests, and the intensity of competition, and the problem of grant awards in competitions Arab, and the allocation of quota and the share of each country, do not! May not get the first place rider of the same state every year or two consecutive years, or to be of the same State Mtsabakan first place in the two branches of the same competition in the same session.

Suddenly stopped talking, stared at his cell phone, he started looking in it, understand it is to remember an important call will be conducted by, he turned his face watching the road until it ends, went through the minutes, silent to speak, close the phone, look in his face, he realized that he heard the news unpleasant Zaigah very he asked himself:

- firm news result for a competition of poetry, and has not participated lucky this time, I ask, no, do not ask him, let him tell you about it is, now may be he does not want to disclose, you feel you know very well the meaning of defeat at the maximum failure Faihs loss Kalmhdja fanatic When his team loses a football game.

Felt like a volcano will boil and pronounces Bhhmmh shortly after, fell their eyes with each and every one says to another:

- I understand that you Vahemena!

Sighed the poet friend sigh deeply, and began to tell the summary of his interview telephony, listening to him binge too, sitting next to him inside the bus, until he reached the name of the Egyptian poet Young (a. H) Hasd Awards, which he read his name in the news published newspaper online, be aware: Ah This is it!

Matchbox!

Was miserly too, puts the shark on the shark; in order to freeze the pound, it spends frozen by only absolutely necessary, in the morning, works as an accountant in a private company, go to the shop to repair the hours in the evening, was aired that profession too, not in the shop except for the bulb and one for lighting , with dim light; fear for their electricity bill, while the central spark Scout proceed with the maintenance and repair of one of the watches.

Afraid to put in his pocket a large sum; to fall into the hands of his wife in the hands of pickpocket or steal, his unconventional methods to hide the money.

On the night of rain, the street is completely free from passers-by, he felt a chill, did not enter by one customer, he decided to shutdown, and sleep early; in order to save electricity and time, are out of the store, remember that in a portfolio of money and paper class two hundred pounds, directed and concealed as usual, once you have Close the locks, cut off electricity from the intensity of the rain, rejoiced at the decision of closing, before he got to his house, the locks Mfssokhh However, one of the thieves predators store for a long time, he entered and closed the same door, get out of his pocket his mobile phone, and try to try running Scout electrical it, but all his attempts ended in failure, began to place his hand felt even signed on a platter by the candle, he said to himself:

- Here is the candle, there must be no match or lighter.

And before the end of his words stuck his hand up to the other mailbox sulfur, Vfathha, and found the paper sticks with sulfur, and when he lit the candle, the paper hopes to whispers to her two hundred pounds, which hid the miser!

Brawl in-laws!!

I wake up early, after the bell rang the alarm clock, everything was ready: the bag, clothing, breakfast; his mother did not sleep, remained throughout the night resulted purposes, before her, carrying everything prepared, came down and stood in front of the house, and found his brother waiting car on the other side, across the road, rode, so it quickly, there remains only a quarter of the clock on the schedule, began mumbled Bozcar morning; even removes tension, arrived to a place of assembly, to stop his brother his car in front of the bus, which she tried to move, down Mehrola, holding Bomtath, that whenever grabbed one of them signed the other hand, looked at him, pointing with his hand:

- Go you, go up the bus, will carry you the rest of your purposes.

Once the door and stepped his bus, he heard a voice shouting Musharraf's trip out loud:

- benefit of this delay?! We were Snterck, you are supposed to Arif Promised?!
- very sorry, but for my brother brought me to his car, which has now reached, it was the way the manual to cut off here, because of the explosion tube water-President, was a water filled the streets surrounding the sea, we were forced to take an alternative route we delayed.
- Overall, thank God for your safety.

And let his brother, closed the bus doors, wheels turned around, sat on his seat The prayer of travel and ride the vehicle.

Started in each group do something; some of them at breakfast, and from there begin to sing some songs, or holding a newspaper, or ponder the way a particular and headphones small ears connected Ptlefonh mobile, journey and a long way, the air inside the bus is quiet, things are going well, but that - and suddenly - burst into a brawl between the two, collect all of the bus around them, trying to disengage, everyone does not understand the reason for this, today from the beginning is going well, all of that and the driver did not care about what is happening and continued in the way, as if he had not heard or seen anything , shouted loudly Musharraf's trip, everybody remained silent:

- both you Sran! How are you arguing?!

The two stood looking at for themselves sometimes, and Musharraf, at other times, surprise and astonishment on their faces! They are not linked by any of the relationships from afar or near, a smile on her face supervisor, questions and eat their heads, supervisor asked the driver to stop at rest in front of the bus passing at that moment, he recalled his supervisor:

- Let's go down to sit in that little break, some drinks Nansa; even tell you the details of the relationship between intermarriage rival.

Young people gathered in a large ring on the supervisor, sat Almichahanan, one on his right and the other on his left, he asked first:

- You Dumiaty?

Shook his head in agreement.

Turned round his face to the other:

- Mnovi and you?

Yes.

Supervisor looked at the faces of those Mahmlqh:

- Which of you knows "beach girl"?

Shouted one of the last Council, waving his hand:

- May I answer?

Supervisor, referring to him; ie, answer, he said:

- is Dr. Aisha Rahman, born in the province of Damietta in 1913, obtained his doctorate in 1950, took over leadership of the Department of Arabic, Faculty of Arts, Ain Shams University in 1962, I wrote poems and articles, and published in newspapers and magazines on behalf of the (girl beach), draw a large group of books, won numerous awards and honors, was one of the most prominent book Al-Ahram newspaper, moved to the Hereafter in 1998.

Supervisor stood up from his place Musfaqa him:

- Well done, you open God, do you know of her husband?

Everyone laughed, looking to some of them:

- Mnovi sure her husband!

- So who is?! As long as you are this intelligent and laugh!

Vantab place terrible silence, as if they were turned into ghosts, did not hear the supervisor of breath and one of them, and he came back and sat on his throne:

- We will tell you, do not forget that the information never:

Her husband Sheikh Amin Al-Kholi, born in 1895 Bashuchy Menoufia Governorate, go to the Hereafter in 1966, graduated at the School of Shariah courts in 1920, was named imam of Egypt's embassy in Rome and then Office of the Egyptian in Berlin, is the founder of the School Renewal in the language and currency and group of Trustees and has many literature, has taught for students of the university, his pupils and his wife, Dr. Aisha Rahman (girl beach).

Secondary observer blind!

Received the "Omr" work administering educational handed over his school, the village of "Abu Fez" Secondary Benin, as an employee manager on the leaves, but as a teacher to teach Arabic and Islamic education in a friendly way between educational administration and management of the school, by the supervisors of such material; of a shortfall in the number of of teachers, passed six months like lightning, "Omr" amused that it works the teaching profession; did not feel that long, to be summoned by the headmaster and told him that the duration of the appointment under test is over, and said to go to request transfer of the administrative officer to the post of teacher, and was the school year nearing completion.

Already made "light" at the request of Mr. Professor, Undersecretary of the Ministry of Education and the county's education, and attach the application of all papers and documents required, and most importantly he was blind, does not fit in the work function of an employee, but the function of Arabic language teacher, with the endorsement of all supervisors and observers, educators, witness his competence in the work in the teaching profession, and mastery of management students in the classroom during teaching, and possession of all the instruments work as a teacher.

Ended the school year and began the summer holiday, no longer a "Omr" goes to school only a few days a week, and is awaiting a decision to convert to the profession of a teacher, and before the start of the new school year one week only, he was sitting "Omr" in the morning listening to the news on TV, rang the phone, grabbed (Remote control) Tv and lower his voice; to hear from the phone number you requested; where the Omr a phone by the characteristic pronunciation of all the phone numbers that relate to it; even know who is calling; because he will not see the number the caller Caller ID screen.

The mind is characterized by "light" photographic memory; where he keeps all the phone numbers, names of the owners, he knew that the figure is the phone number the caller school, "Abu Fez", so the "Omr" quickly walked to the phone to hold headset telephone, Verwaha he says:
Peace upon you.

Re CALLER: and you Peace, speak to me - please - Professor Omr.
Individual Omr: Welcome Professor Abdul Aziz, Omr with you.

Abdulaziz: How are you my Omr?
Omr: Praise be to Allah, I am in grace.

Aziz: I have news for you will Iverg.
Omr: the best you our teacher, humans.

Abdulaziz: reached school has just hired a teacher's decision Arabic Language and Islamic Education, and included the period prior to the service.
Omr: God is great, thank God, thank professor AA Abdul Aziz.

Abdulaziz: A Omr Congratulations, you're a person (the son of old), and hard and deserve all the best.
Omr: God bless you, and we extend our teacher in your life, this is all thanks to God, then Mjhdgkm with us during the last period.

Abdulaziz: God willing - the Almighty - come early tomorrow; to receive a decision and going to the Department of Education; to end settlement procedures in the new profession.
Omr: God willing - the Almighty - the eighth time I will be in front of your desk, do you order me anything Aziz professor?
Aziz: No, my Omr, I want you well and in health, see you on the best tomorrow.

Telephone conversation between them ended, and a headset phone, then shouted, calling at home:

◆ O pilgrim, you need, where are you?

His mother, he replied: Yes, Omr, I'm in the kitchen.

Haj Mohammed came out of a room salon: the best you Omr, so why cry?

◆ Professor Abdul Aziz was with me on the phone, and told me that the decision of my appointment as a teacher arrived at school, and read me the text of the resolution, I will go tomorrow to the Department of Education; so I receive.

He sat next to him and his parents Ihniana, and Abarcan him for this good news.

Received the "Omr" job as a teacher, and began the school year is full of vigor and vitality, and passed the days and months that the school year approached its end.

He was sitting "Omr" in the Chamber of Arabic language teachers, and in front of him a cup of tea next to a box of biscuits, sitting next to him Professor "Zechariah," his colleague in the teaching of Arabic language school, Atnaakecan the question of the exams, and entered upon the room, "Abraham," seeking in school, he says:

◆ Good morning teachers.

Individual Zakaria: morning light, O Abraham.

Omr said: How are you, O Abraham? And how the conditions of your children?

Ibrahim: Thank God, O professor of Omr, you hand over all of us, comes a letter from the Department of Education, sir Omr.

Omr: A letter from the administration! For me?

Ibrahim: Yes, the mail arrived with the school, came off from the administration, please, here it is.

Stretched out his hand and Zakaria was caught, he said, is with me, sir Omr.

Omr: very sharp, thank you very much Ibrahim, God bless you.

Ibrahim: Sorry, Professor Omr, do you order me something?

Omr: Thank you, God in safety.

He remained silent, "Omr" a little until the "Abraham" of the room, in the meantime was "Zechariah," looks at the speech and Iklbh; even understand what was in this speech, then said: "Zechariah."

Zakaria: Yes Omr.

Omr: Open this speech even know what to do.

Zakaria: the present, for one moment, and grabbed the scissors, and began to open the outer envelope, and took out the paper in it, and the Pferdha, and began to read:

Giza Governorate, educational administration, Mr. Honorable / Omr Mohammed Omr, a teacher's school (Abu Fez) High School, Greetings; inform you that he has signed you choose; so you will be within the control in the general secondary certificate this year, and will be Toseekm Observers on the Cairo governorate, and you review the Department of Education; to receive a schedule of the dates and days of examinations and the school that will be the committee that the Tracbon; and you thanks and high appreciation; Director General of Examinations.

Raised, "Zechariah," his head looks to the "Omr", which did not say a word, leaving a "Zechariah" silent, wants to know the reaction of "light" on this news, when the longer Scott "Omr," said Zakaria: Omr, my Omr, why You are silent?

Omr: Ah, ah, what do you say Zakaria?

Zakaria: What do you say?! You're not with me! Where did your mind, man?

Omr: God, I feel that my world revolves.

Zakaria: You are not happy or what?

Omr: What calls to happiness?

Zakaria: no doubt, a very big opportunity; monitoring exams, means a big bonus.

Omr: Oh, man, you do not notice anything?

Looked at him, "Zechariah" and showing signs of surprise and confusion, began to turn around and look in all directions, did not respond to "Omr" with something.

Omr said: Where are you, Zechariah?

Zakaria: I'm here, I did not notice anything?

He laughed, "Omr" out loud, as if making fun of it, and began to calm down from laughing, and say: Do not get angry to me, Zacharias; I laugh because you did not understand my words, man, I'm blind.

Zakaria: What is new in that? What is strange about this?

Omr: How do I Monitor exams to students? Exams are not unusual, this high school exams!

Zakaria: means you do not want to go out and implement Tklikv.

Omr: Absolutely, God willing, tomorrow I will go to educational administration, and I apply for an apology.

Already gone "Omr" and made the request, but during his presentation, the employee told him: This request will not be accepted; because the General Committee of the control on the exams completely reject any request for an apology.

Under the "Omr" is awaiting the approval of his apology, but he did not accept, he went the first day of exams, and release the minutes of the police station of his school, which by the Committee on the exam that was supposed to watch them, and record the incident in this record; of the letter of assignment control, and a copy of the request to apologize, and proof that blind, how the teacher is sighted to watch the students during exams?

Then contact the police department administering educational telling her about it; to take action; because the exam has begun, came General Manager of Legal Affairs of the Department, he told the officer: It is not there anything in the regulations and laws to prevent any teacher blind of observation in the examinations, and therefore it must be go "Omr" to the committee tomorrow, and will start his work, and it will calculate the first day that the absence of normal, astonished the officer, and the exclamation point "Omr"!

Decided to "Omr" that engaged in that experience wonderful.

The next morning:

Install "light" car (microbuses) that transport a group of teachers who work with him in his school, they go to watch in the same place, and the car drove all teachers chatting and laughing with the "light" on how to monitor the students during the exam!

Connection of the "Omr" to the examination committee, and signed in the book of the audience, knows that he will be watching today's students in the department moral, and material that tested the students today is the Arabic language, was chosen another colleague named "Fouad", will be in the same committee that the "Omr", was known as "Omr" on "Fuad" in the room an observer in the committees, took "Fouad" "Omr" to the place of the chapter and distributed by him, where he was "light" the first time bring together the "Fouad", entered the classroom and the students sitting in their places according to the serial numbers sitting; each student in the seat reserved for

him.

He began, "Fuad" distribute papers questions and brochures to answer the students, while the "Omr" stands at the forefront of chapter speaks to students and give them instructions; say to them: The duration of the test is three hours, and reminds them of personal statements to brochures to answer before they begin to resolve questions .

The "Omr" standing in front of students, wearing over his eyes glasses luxury, not students feel that the blind do not see them, the students started reading the questions, and began attempting to answer, but "Fouad" Once that is over the distribution of securities of the students sat on a chair at the end of the season, and closed his eyes and started to sleep, so much so that after five minutes, Chkarh voice rose, which the students are very upset, and began to "Omr" heard mumbling students, he asked them, 'O children, what news exam?

Individual by a group of them and they said: a long exam, the exam is difficult, an indirect test.

Omr: Do not you, Cool It, Read the questions in order, but in a low voice; so as not to hear one outside the classroom, I'm willing to test the full lawful to you; I am a teacher of Arabic language high school, but on the condition!

One student asked him: What is your condition, sir?

Omr: that some of you gathered from each book or memorandum or papers related to Arabic language, or anything in your pockets Takbiouna, and Tdauh the whole front of me here on this table.

Students started out some of what Baoh, but timidly, not out everything; they do not trust the words of this teacher, and they were saying: Is this a reasonable professor will solve our exam?!

How to become Assistant to the Comptroller and fraud at the same time?! Then the one student who sits on a front seat reading it the first question, and once he had finished the student question, go "light" cast on students to answer, and they hold Boqlamanm write what comes out of the mouth of "Omr", as if they were in the lesson for dictation, and then they read him the question the next, he answered smoothly, before ending the duration of the test by more than an hour over all the students of the answer is very typical, and "Fuad" is still asleep as parents cave, did not feel anything that happened in the classroom, did not hear any of the answers delivered by "Omr" to the students.

Asked a student Omr: sir, are you Arabic language teacher?

Omr: Yes, I am Arabic language teacher.

Asked another: Why wear this black sunglasses and you're in the classroom? He smiled, "Omr" and his eyebrows rose, and took a deep breath, then said, my darling, I'm blind.

The word came down to the students a thunderbolt: blind!
Omr: Yes, blind.

Students: How so, sir? And monitor in the exam?!

Omr: God, I am surprised more of you, I consider this the first case of this has happened in the history of the Ministry of Education, it is true that the dean of Arabic literature, Dr. Taha Hussein was blind, and although it was the minister of knowledge, but the Minister; ie, a political official and regulatory framework for education, Monitor test is not a High School and, unfortunately, insisted educational administration not to accept my apologies for control, and it gave as the reason that there is nothing to prevent the blind from surveillance examinations.

The students laughed, and said: Thank God they refused, sir; to see you today.

Omr said to them: for I answer you the exam rather than you? Overall I'm happy most of you, now you will not forget me never for your age.

They replied: Sure, sure, sir.

One student asked him: did not know your name, sir.

Omr: My name is Omr .. What time is it now? How much remained to the end of the exam?

Individual one of them: left about a third time.

Omr: very sharp, now you finish you all of the answers, please be gathered brochures answer, neatly, according to figures Jloskm In descending order, then placed in this file, a file handle in his hand and points it.

Indeed, students collect brochures and answer Rtboha also told them, "Omr", and then placed in the file.

Suddenly awakened Professor "Fuad" sleeper from the commencement of the exam, and stood on the chair, and looked around, and found that all students have no brochures to answer, so he headed to where it sits, "Omr", as he looked at the hour of his hand but he knows that the rest of the term of the exam less than ten minutes, he asked, "Omr", saying: O Professor Omr, do students of the test is over, and brought them pamphlets answer?

Omr laughed and said: Thank God for your safety, wellness sleep, man! You did not sleep a month ago?!

Fouad: By God, sir Omr, did not sleep two days ago, my wife placed two days ago and had a son, an all-night crying, and I can not sleep.

Omr: Congratulations, reared in thy strength, God willing, to answer all the pamphlets in this file.

Hold the "Fouad" file, and began to prepare to answer brochures, and make sure they are correct according to the number of students within that Committee, and arranged correctly depending on the numbers sitting, he said: Allah is the greatest professor of you, O Omr, and pamphlets arranged! How

did you do that?!

He laughed and said Omr: special abilities.

Talks between the "Omr" and "Fuad" and all students are listening to this speech, one of whom did not speak, did not try to know the professor, "Vaada" Anything that happened in his sleep.

Then rang the school bell announcing the end of the period of the exam, and everyone came out of the season, all students in this chapter talking about this professor, "Omr", wearing black glasses.

Who pay a "Omr" to do what he did with these students during the duration of the test, is that it is aware of his fellow observers before the start of the test, that this school will be the case fluidity during the observation; will allow fraud, but will enter the answers in writing for some students, When asked why, was told that there is a group of students examiners school children of members of boards of parliament and localities, and the children of businessmen, money and influence, and said to him, a teacher: (from the other), the committee sold and paid a lot, in addition to the instructions coming from the Directorate of Education!

The next morning (the second day of testing in high school):

Has reached the ears of general supervisor of the control (Chairman) in this school, what happened to Mr. "Omr", the test of the Arabic language, and by means of a telephone conversation between him and the guardian of the students who were in separate Professor "Omr", where was the guardian businessman and one of the richest province, who promised to reward the very large after the end of exams if performance has remained within the regulatory separation of his son in this way, had been asked to prove that the Professor "Omr" as an observer of this chapter to the end.

When the professor arrived "Omr," school, entered the general supervisor, and handed over to each other very warmly, and said to him: Is it possible, sir Omr to ask you a simple request?

- ◆ I prefer our teacher, you are ordered.
- ◆ watching today also in the same chapter that you are watching it yesterday!

- ◆ laughed Omr, and joy flooded his face.
- ◆ What Adgk Omr, sir? Is there something I said while laughing?

- ◆ Never, O My dear sir, but I ask you this request, but you preceded me and requested by you first, gladly OK.
- ◆ clear you're a person is very cooperative, Omr, sir, I am very happy with the circumstances that made me meet you, God willing, be good to know.

All this and the "Omr" he says to himself: no good, man? You are corrupt and cheat, to sight a close tomorrow.

And went "light" and went to the chapter, and when he peered his face to the

students, they are all handed him one by one, and they thank him for what he did with them yesterday, and say: You will get a final grade in a test of Arabic, even if we wrote papers that were with us you will not get the final grade.

There was a shortfall in the number of observers in this school, which requires the presence of an observer and only one chapter in most chapters of the school by the Committee on the test, but on the first day of the tests made with the professor, "Omr" observers last, when they knew he was blind, but they want all observers existing school is sighted; students to do what they wish.

Before the start time of the test one minute, found a "Omr" head committees exist with dismissal, holding file answer sheets and questions for examination of history, said Omr: I will Ozaa papers questions and brochures to answer the students, then leave you with them, and you are at the end of the test collect brochures to answer them as I did yesterday.

Individual Omr: I mean I will be alone in the classroom today?

◆ He said to him today and until the end of the tests, as you know, sir Omr, here is an acute shortage in the number of observers who have been be engaged by the Department of Education for this school, in addition to that there must in every day to be without an observer or two observers, increasing the deficit, God willing, from today onwards you will be alone in the classroom; you are good and the pool, and each test will come I am myself to you the papers and pamphlets dispense to the students in the first five minutes, then leave you and go and I begin the rest of the administrative work of committees, now you want me something?

- ◆ Omr: Thank you Mr. my teacher, I see you after the end of the test.
- ◆ Peace upon you.
- ◆ and you Peace.

Omr: O Habaybe Lhaloan, you know of course what are you doing today?
Individual and one of them: today, sir exam date, you Arabic language teacher, will be able to Tgchhna like yesterday in history as well?

Omr laughed and said, of course; I am a fan of history, and there is no historical information only, and I know, but first as we did yesterday Tgmon and go out with you all.

Already the students started collecting everything, and they are more satisfied than yesterday, and did not leave them anything at all, unlike what they did on the first day, he tested the Professor "Omr" in the Arabic language and succeeded, not disappointed in it, and when they finished collecting their possession, request Omr of them: that is one of them and come out of the class and calls for any factor (bed) is sitting corridor that is surrounded by this chapter, and actually came Group, asked him to "Omr" to carry all the papers and books collected by students and goes away from the Chapter When he saw worker said:

- ◆ God is great.

Omr replied: What you?

◆ sir, papers and many books too! Moment come and go big plastic bag until I bring this large amount; located so as not to me something on the ground, he went Group.

Said Omr for students: Let's Start the not waste time, send us your brochures to answer, and answer Stroa brochure, due to this factor and raise these things - it refers to what Jmauh - and then begin to resolve the questions.

Came back working after several minutes and raise these papers and books, and clean the place entirely of them, and all students Mpsotin and comfortable with what is happening; because they will take the answers to exam questions are typical of the head teacher "Omr" directly, without the effort in the search for the answer in the papers that were with them .

Students began reading on the ears of Mr. "Omr" questions even begin to Amláúhm the answers, but he remained silent, under this situation has been going crazy, they began to lose their nerve, not Professor "Omr" speaks and throws them the answers and promised them, and there with them, even if a small paper to cheat them, they say to each other: "work in us dump Professor, Professor, work that he does not hear, a professor of clay and authorized permission of the dough."

All of these phrases heard Professor Omr, but it does not show her any attention, with a laugh from the inside.

The situation as it is, and passed the minutes, Valsaat, and they do not know what to do? Papers and books taken from them, and carried the bed and took her away, rang the school bell announcing the end of the period, They collected pamphlets answer empty completely any answer, but some students have taken what is written in the paper questions in the booklet to answer rather than hand it is completely discharged, Some of them wrote some love poems and love, and some of them wrote some lyrics youth falling, but there is only one student who wrote all that has happened!

Yes, all that has happened in the chapter on the first day and second, what he did to them that the blind professor; in order to take revenge on him after they laughed, and promised not Agchchehem fraud.

The next day (the third day of testing high school):

Asked Sheikh "Omr" from the President of the committees, to distribute it today and in the remaining days of tests on the different chapters, but this first chapter where he spent the previous two days, so watch every day of the season is different, and already heard the President of the committees words of Professor "Omr", and did not refuse his request; as Sarah did not expose up to this moment; because the students had floated in the world for teacher myth, and that observer feat Amoch for students, could not one of them to come back and deny what he said, especially as it is word of a mass of them all, did not dare one of them that happens no one in his house what happened to them on the second day of the test, the matter was over and they became

Raspin all; because they will receive a degree (zero) with pride in the test of history, and found all that it does not need to talk to their parents, and especially that they are still at the beginning of tests.

Already distributed Professor "Omr" in order to monitor the other chapter, and when he went to this chapter has occurred from the same scenario that happened with the first chapter, especially since all students in school predisposed psychologically to deal with this professor blind, because speech is much that they heard him, and especially that their colleagues Even after the exam date when asked: Do you do the same with your Professor what he did with you in the Arabic language, they all said: Yes, exactly happened! Did not deny!

On the fourth day of tests:

When he learned students of the first chapter, that Professor Omr had watched yesterday on the separation of non-separated, they agreed to do a campaign and the broad middle classes Committees school, that this professor world is objective, and know anything at all, he knows all the subjects for high school; and that to confirm and create an environment the rest of their colleagues to fall into this trap, even ensure that they will not Arspoa alone, but all the chapters of the school, and have the devil from the minds of these students, especially after they should have fallen into the trap of this professor, are no longer interested in what remains of the tests; because they Raspun Raspun, so he headed all their attention to how to persuade the rest of the students of the other chapters of this teacher; to surrender to him without effort, and surrender to him with the utmost ease and convenience!

Indeed, he was soon to enter the Professor "Omr" new chapter on a new test, it does not speak anything, the students used to doing everything they wanted them automatically, without any little resistance, and susceptibility of very severe, and was standing every time a worker is expected to holds papers, notes and books and kept them from the chapter of Professor Omr.

Strange and amazing that in each separate Omr enter and do what it does, it must be a student writes one or more of these students what happened in the Committee, as a kind of damage to the observer so blind!

Has passed Professor "Omr" to monitor all classes in this school, so that did not deliver one of the trap and put it, he did Professor Omr what he did; in order to take revenge on that network dirty that helped and facilitated the fraud within the schools, and the one which is not sighted disclose This gang of corrupt, strongly foresight - with the help of God and the virtue of it.

Ended days of tests, he was Chairman of Committees praising Professor "Omr," but says the poem, from the large appreciation has insisted on the final day of testing, to conduct a "Omr" himself to his home in his own car; to express his heartfelt thanks as I do with him and his students throughout the days of tests, which he said: It will not forget the days of his memory, they are of the most beautiful days of age.

Omr reply to him, but without words, it is between him and himself, actually days will not be forgotten, but of the worst days of age, (O funds. News today tomorrow will be free)!

The brochures answers to the students of this school, you go Komthalha from other schools, to control debugging and monitoring scores in the sector, which includes five provinces, and the assessors of all those provinces, and when he found Msahho subjects of different brochure one or more, written the story and the story of this observer blind , is general manager and supervisor of the exams at the level of the Republic, having to tell the First Undersecretary of the Ministry of Education, who briefed the Minister of Education on the matter - an investigation secret for that school, and collect all the brochures answer in different materials, and check what he wrote about control and workflow within the committees of that school, and passed the patch days, and no one knows what happened?! But Professor "Omr" itself, and students Alsaktin silent cheaters!

That one day announcing the results of the early high school at the level of the Republic, and met all the visual media, audio and written in Egypt, in the Office of the Ministry of Education in the waiting press conference which will be announced when the minister himself from the names of the top ten in each section of high school.

At the beginning of his speech at the conference noted that there is a topic large, and a scandal greater, occurred during the course of general secondary examinations this year, but he asked the journalists to postpone talking about it until the end of the announcement of the first, it is better to talk something heartening, then concludes something disappointing .

Already walked the press conference as planned, he began telling the story of a professor of Arabic language the blind, who became an observer to test high school in the school by the students of the children (NAS important) as they say, and listed in detail what happened in the chapters of this school, and the findings of the investigation, then announced that the ministry has decided the following:

First, regarding the outcome of students of this school: one does not work!

Second, exchange reward of twenty thousand pounds for the Omr Professor Muhammad Ibrahim Omr, with Sam and give him the ideal teacher for this year at the level of the Republic, and exempted from controls on any exams or tests occur throughout his career.

Third, has been shut down President of the Committees on the exams for this school work, until the conclusion of the investigation with him in the prosecution; for taking bribes from parents of students.
