Reading Comprehension

Read the following passage, and then answer the questions below:

I prefer bicycles to horses. It is true that a horse can go over a rough ground, jump and ever race but a bicycle can’t. People say that the horse, being an animal, one may make a friend of it, while no one ever thought of making friends with a bicycle. Moreover, they say that horses can carry heavy things and travel long distances.

Besides, horses were very useful in the past when people used them for fighting their enemies and for travelling. But, on the other hand, a horse is too expensive to buy and keep. Moreover, horse riding is an outdoor activity. People can’t practice this sport in winter when it is very cold and heavily raining. Read the following passage then answer the questions below:

A dictionary is very important for all learners; it gives them the different meanings of a word. Most dictionaries help them to pronounce a word correctly by using pronunciation symbols. Moreover, it shows the learners how to use the word by giving examples in sentences. When you meet a new word, it isn’t a good way of learning a language to think of using a dictionary all the time. It is better for you to try first to understand the idea of the passage and guess the meaning of the word, you can look at the spelling of the word and try to remember other similar words which may help you get the meaning, if these ways are not helpful to get the meaning, get the dictionary then and look it up. Water covers almost seventy one per cent of earth. It's an enormous part but only two per cent of water is fresh. A lot of animals and plants adapted themselves to survive below or above water. They can be very tiny like bacteria or very big like whales.
