# Introduction

*400 Must-Have Words for the TOEFL®* will help you improve your score on the TOEFL test. In particular, this book will build your TOEFL vocabulary for the new Internet-based TOEFL of 2005.

This book is designed for ease of use as a self-study guide. Its chapters were written for easy completion in one sitting—about 25 minutes. *400 Must-Have Words* is also highly effective in the TOEFL-prep classroom.

Each chapter begins with a list of 10 target words. These words are defined and used in sample sentences. Usage tips are given for many words, as are any commonly used parts of speech related to the target word.

Following these definitions, the words are practiced in three exercises. TOEFL Prep I and TOEFL Prep II give straightforward practice in a variety of easy exercise styles. The last exercise, TOEFL Success, includes a TOEFL-style reading followed by one or two authentic TOEFL-style questions. Most TOEFL Success readings incorporate all 10 target words, and most also include an additional bonus structure. Each chapter ends with an answer key so you can check your work.

As an extra feature, this book includes a special front section called “Six Quick Hints for Success on the TOEFL®.” These hints give general test-taking advice for TOEFL success.

This book was written by ELT professionals who help prepare students for the TOEFL test. Their selection of words for this book was based on extensive experience with the TOEFL test, information about the corpus (body of words) that is used in creating the actual TOEFL test, and TOEFL materials published by ETS, the creators of the TOEFL test.

*400 Must-Have Words for the TOEFL®* is the best book on the market to improve your vocabulary for the TOEFL test.

## Six Quick Hints for Success on the TOEFL®

1. **Try to understand a reading or lecture as a whole.** Unlike earlier versions of the TOEFL, the new version tests whether you can see how ideas interact in a longer reading.
2. **Take notes.** Especially in the listening section, you will need notes to remember what you have heard. Note-taking will also help you concentrate. You can practice by taking notes of news stories, documentaries, or lectures.
3. **Study grammar in context, not by itself.** Unlike earlier versions of the TOEFL, the new version has no grammar section. Your knowledge of grammar is useful in helping you understand the readings and lectures, not in answering grammar-specific questions.
4. **Practice writing essays that express your opinion on a topic.** The writing section of the 2005 TOEFL includes questions asking for your opinion on various daily topics. These are timed. Practice writing under a time limit, shaping your thoughts into a well-rounded essay.
5. **Build up your academic vocabulary.** Your ability to comprehend reading passages rests largely on your academic vocabulary. Build your vocabulary by reading, making flash cards, and writing sentences using new words in context. A strong vocabulary will help you not only in your reading comprehension, but also in listening, writing, and speaking.
6. **Commit your attention to the test.** Some of the topics covered in the test may not actually interest you. Still, your focused energy will improve your test score. Agree with yourself not to think about other topics during the test. Force yourself to keep your attention on the tested material.

## Target Words

1. abandon
2. adversely
3. aggregate
4. cultivation
5. fertilize
6. intensify
7. irrigation
8. obtain
9. photosynthesis
10. precipitation

## Definitions and Samples

1. **abandon** *v.* To leave; to give up

To save their lives, the sailors had to **abandon** the sinking ship.

*Parts of speech* abandonment *n*

2. **adversely** *adv.* In a harmful way; negatively

Excessive rainfall early in the spring can **adversely** affect the planting of crops.

*Usage tips* *Adversely* is often followed by *affect*.

*Parts of speech* adversity *n*, adverse *adj*

3. **aggregate** *adj.* Gathered into or amounting to a whole

It is impossible to judge last year's performance without knowing the **aggregate** sales numbers.

*Usage tips* *Aggregate* is often followed by a term like *sum*, *total*, or *numbers*.

*Parts of speech* aggregate *v*, aggregate *n*

4. **cultivation** *n.* Preparing the land to grow crops; improvement for agricultural purposes

With the development of land **cultivation**, hunters and gatherers were able to settle in one place.

*Parts of speech* cultivate *v*

5. **fertilize** *v.* To supply with nourishment for plants by adding helpful substances to the soil

This farm **fertilizes** tomatoes more than any other crop.

*Parts of speech* fertilizer *n*, fertilization *n*

6. **intensify** *v.* To increase in power; to act with increased strength

Jacob's long absence **intensified** his certainty that he should marry Rose.

*Parts of speech* intensification *n*, intense *adj*

7. **irrigation** *n.* The supplying of water to dry land

In dry areas of the country, you can see ditches all over the farmland for **irrigation**.

*Parts of speech* irrigate *v*

8. **obtain** *v.* To gain possession of; to get

After a series of difficult interviews, he finally was able to **obtain** the job.

9. **photosynthesis** *n.* The process by which green plants make their own food by combining water, salts, and carbon dioxide in the presence of light.

Oxygen is a by-product of the process of **photosynthesis**.

*Parts of speech* photosynthesize *v*

10. **precipitation** *n.* Water that falls to the Earth's surface

In the Pacific Northwest, the high level of **precipitation** ensures rich, green plant life.

**TOEFL Prep I** Complete each sentence by filling in the blank with the best word from the list. Change the form of the word if necessary. Use each word only once.

*abandoned precipitation cultivation fertilize photosynthesis*

1. Through \_\_\_\_\_, green plants create organic materials with the help of chlorophyll.
2. The coastal city gets half of its \_\_\_\_\_ during the months of January, February, and March.
3. Farmers use various methods of land \_\_\_\_\_.
4. When they heard the hull crack, all but two of the sailors \_\_\_\_\_ ship.
5. Inexperienced gardeners may not realize how important it is that they \_\_\_\_\_ their plants.

**TOEFL Prep II** Find the word or phrase that is closest in meaning to the opposite of each word in the left-hand column. Write the letter in the blank.

- |                     |                |
|---------------------|----------------|
| _____ 1. obtain     | (a) weaken     |
| _____ 2. intensify  | (b) separate   |
| _____ 3. irrigation | (c) lose       |
| _____ 4. aggregate  | (d) drainage   |
| _____ 5. adversely  | (e) positively |

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the questions that follow.

In countries like Niger and Mauritania, the *cultivation* of land has changed little in the past several centuries. Additionally, these countries' mono-modal rainfall pattern brings *precipitation* for only three months during the year. **As a result**, food production doesn't nearly meet demand.

**Bonus Structure—**  
As a result means  
“therefore,” “for  
this reason.”

Several agencies and organizations have *intensified* their efforts to increase the productivity of land in these countries. They have introduced new strains of seed, improved *irrigation* techniques, and introduced new methods of *fertilization* and soil management. With ample sunlight for *photosynthesis* and modern *irrigation* techniques, sustainable farming techniques should allow farmers to boost *aggregate* production in order to meet demand.

Still, crop revitalization faces an unexpected adversary: institutional incompetence. Where crop specialists have convinced individual farmers to *abandon* old farming techniques in place of new, they can't readily *obtain* the governmental cooperation they need. The biggest hurdles are political corruption, incompetence, and the absence of a marketing infrastructure.

1. In this passage, the word adversary is closest in meaning to
  - a. friend
  - b. helper
  - c. enemy
  - d. leader
  
2. In the last paragraph, the word they refers to
  - a. crop specialists
  - b. farmers
  - c. farming techniques
  - d. adversaries

- |                       |                                 |
|-----------------------|---------------------------------|
| _____ 1. persevere    | (a) to pass by without hitting  |
| _____ 2. anticipate   | (b) to give up                  |
| _____ 3. famine       | (c) to not see something coming |
| _____ 4. collide      | (d) harmless                    |
| _____ 5. catastrophic | (e) excess of food              |

**TOEFL Prep II** Circle the word that best completes each sentence.

- Residents of Hawaii must accept the possibility of a volcanic (eruption / perseverance).
- Years after the accident, she was finally able to (anticipate / unleash) her feelings of anger.
- Houses along the river often face (famine / flooding) during the rainy season.
- Many people think it is cruel to (collide / plunge) live lobsters into boiling water.
- A well-written essay should make some kind of (catastrophe / impact) on its readers.

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the questions that follow.

Nature challenges humans in many ways, through disease, weather, and *famine*. For those living along the coast, one unusual phenomenon capable of *catastrophic* destruction is the tsunami (pronounced “tsoo-NAH-mee”). A tsunami is a series of waves generated in a body of water by an impulsive disturbance. Earthquakes, landslides, volcanic *eruptions*, explosions, and even the *impact* of meteorites can generate tsunamis. Starting at sea, a tsunami slowly approaches land, growing in height and losing energy through bottom friction and turbulence. Still, just like any other water waves, tsunamis *unleash* tremendous energy as they *plunge* onto the shore. They have great erosion potential, stripping beaches of sand, undermining trees, and *flooding* hundreds of meters inland. They can easily crush cars, homes, vegetation, and anything they *collide* with.

To minimize the devastation of a tsunami, scientists are constantly trying to *anticipate* them more accurately and more quickly. Because many factors come together to produce a life-threatening tsunami, foreseeing them is not easy. **Despite this**, researchers in meteorology *persevere* in studying and predicting tsunami behavior.

**Bonus Structure—**  
**Despite this**  
*means “even so; regardless.”*

1. Which sentence best expresses the essential information of this passage?
  - a. Tsunamis could become a new source of usable energy in the next hundred years.
  - b. Tsunamis do more damage to the land than flooding.
  - c. Tsunamis can have an especially catastrophic impact on coastal communities.
  - d. Scientists can predict and track tsunamis with a fair degree of accuracy, reducing their potential impact.
  
2. In the first sentence, why does the author mention weather?
  - a. because tsunamis are caused by bad weather
  - b. because tsunamis are more destructive than weather phenomena
  - c. as an example of a destructive natural force
  - d. as an introduction to the topic of coastal storms

**Lesson 2** Disaster

*TOEFL Prep I* 1. b 2. c 3. e 4. a 5. d

*TOEFL Prep II* 1. eruption 2. unleash 3. flooding 4. plunge  
5. impact

*TOEFL Success* 1. c 2. c

# Evolution and Migration

## Target Words

- |               |              |

- \_\_\_\_\_ 3. Few sea turtles manage to live through their first year of life.
- \_\_\_\_\_ 4. This age group tends to support current educational policies.
- \_\_\_\_\_ 5. Her thinking about economics has changed slowly in the last several months.

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the questions that follow.

The *migration* from Asia to North America across the Bering Strait (perhaps by land bridge) was a monumental event in human history. The *process* of overspreading the Americas took more than 1,000 years, or 30 *generations*. This might seem to confirm common sense—that slow travel was *inherent* in any great migration without wheeled vehicles across unknown terrain. **Further thought** shows that this process was remarkably fast—about 10 north-south miles per year, on average. The Americas were populated at an astounding pace, when one considers the *physical* limits of the human body and the physical *features* of the American continents. Legs of humans can move only so fast under the best of circumstances, and they work even slower over mountain passes or deserts. Populations spread through the *diverse* regions of the Americas (grasslands, eastern forests, coastal swamps) and needed to *adapt* to their new environments. The migrants' lifestyle had *evolved* over the years to that of professional nomads ensuring that they would find the resources needed to *survive*.

**Bonus Structure—**  
**Further thought**  
means “looking deeper; thinking more.”

1. Which sentence best expresses the essential information in this passage?
  - a. Human migration across the Bering Strait was remarkably slow.
  - b. Physical limitations made migration across the Bering Strait almost impossible.
  - c. Humans readily adapted to life in the Bering Strait.
  - d. The migration through the Americas was surprisingly fast.
  
2. In this passage, the word monumental is closest in meaning to
  - a. disastrous
  - b. evolving
  - c. important
  - d. physical

### Lesson 3 Evolution and Migration

*TOEFL Prep I* 1. e 2. d 3. b 4. a 5. c

4. Automobiles are responsible for some (emissions / extinction) of greenhouse gases.
5. By the end of the storm, the hikers had (depleted / reserved) even their emergency stores.

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the question that follows.

Human consumption of fossil fuels is expected to fully *deplete* the Earth's crude oil reserves by the year 2060. As underground *reservoirs* of oil continue to *shrink*, we have no choice but to find alternatives. **One promising source**, with much cleaner *emissions*, is called bio-diesel. Bio-

**Bonus Structure—**  
One promising source signals the point of this paragraph.

diesel is often made from soybean oil, although it can be made from any vegetable oil that is not *elementally* different from soy. Bio-diesel can even be made from used cooking oils that homes or restaurants would otherwise *dispose of*. Bio-diesel can be used without *constraint* in any vehicle that runs on diesel—no modifications are needed. Presently, diesel engines can take up to 20 percent soy in their soy-diesel blend. As the need for bio-diesel increases and the technology improves, we may soon witness the *extinction* of the fossil-fueled vehicle. This is good news for the planet, as bio-diesel is a more *stable* source of energy than petroleum, and it reduces *contamination* of our air and water.

An introductory sentence for a brief summary of the passage is provided below. Complete the summary by selecting the three answer choices that express the most important ideas in the passage. In each blank, write the letter of one of your choices.

Bio-diesel is a promising alternative to fossil fuels.
•
•
•

- a. Humans have shown little self-restraint in their consumption of fossil fuels.
- b. Underground reservoirs of oil will soon be depleted.
- c. Bio-diesel burns cleaner than fossil fuels.
- d. Bio-diesel comes from a more stable source than petroleum.
- e. Restaurants can save disposal fees on used cooking oil.

1. **adjust** *v.* To change; to get accustomed to something

Travelers are advised to **adjust** their watches before arriving in the new time zone.

*Parts of speech* adjustment *n*, adjustable *adj*

2. **arbitrary** *adj.* Chosen simply by whim or chance, not for any specific reason

The decision to build a school in Blackberry Township was **arbitrary**, without any thought to future housing patterns.

*Parts of speech* arbitrate *v*, arbitrator *n*, arbitrarily *adv*

3. **denominator** *n.* The number written below the line in a fraction

In the fraction  $\frac{1}{2}$ , the number 2 is the **denominator**.

*Usage tips* The phrase *lowest common denominator* means “the most basic and unsophisticated things that most people share.”

*Parts of speech* denominate *v*, denomination *n*, denominational *adj*

4. **exponentially** *adv.* At a very fast rate

In Turkey, the value of the lira has decreased **exponentially** in the last several decades.

*Usage tips* *Exponentially* is taken from mathematics, where an exponent is a number indicating how many times something is multiplied by itself. For example,  $4^3$  contains the exponent “3,” indicating  $4 \times 4 \times 4$ .

*Parts of speech* exponent *n*, exponential *adj*

5. **infinitesimal** *adj.* Immeasurably small

The number of contaminants in the water was **infinitesimal**, so the water was safe to drink.

*Parts of speech* infinitesimally *adv*

6. **maximize** *v.* To increase or make as great as possible

A coach helps each athlete **maximize** his or her potential.

*Parts of speech* maximum *n*, maximum *adj*

7. **parallel** *adj.* Being an equal distance apart everywhere

The street where I live runs **parallel** to the main road through town.

*Usage tips* *Parallel* is often followed by *to*.

*Parts of speech* parallel *n*, parallel *adv*

8. **proportion** *n.* A part in relation to the whole

The average employee spends a large **proportion** of each workday answering e-mails.

*Usage tips* *Proportion* is often followed by *of*.

*Parts of speech* proportionate *adj*, proportionally *adv*

9. **rate** *n.* The cost per unit of a good or service; the motion or change that happens in a certain time.

Postal **rates** in Japan are among the highest in the world.

Some grasses grow at the **rate** of one inch per day.

*Parts of speech* rate *v*, rating *n*

**Bonus Structure—**  
As we all know  
is a writer's device  
for appealing to  
common knowledge.

Time is, as we all know, money. Such valuation of time leads people to extreme efforts to *maximize* their use of time. Some people obsess over knowing the exact time. They buy clocks and watches that automatically *adjust* themselves over the Internet or by radio waves. These measurements allow them *infinitesimal* accuracy in dealing with time. Regardless of how one tracks time, most people share a common goal: They want to use time effectively. Since about 1982, this efficiency has increased *exponentially* each year, thanks to computers and their ability to multitask. In multitasking, a computer executes several different tasks in *parallel*. Rather than being set *arbitrarily*, each task is given a priority in the computer's operating system, and time is spent in *proportion* to the priority of the task. The computer executes different *sequences* of tasks at different clock cycles, thereby increasing the *rate* of output from a process.

1. Why does the author mention computer multitasking in this article?
  - a. because it is new
  - b. because it measures time better than any clock
  - c. because it helps people to arrange their activities sequentially
  - d. because it is a good example of the efficient use of time
2. The underlined word *sequences* in the passage is closest in meaning to
  - a. styles

Organic products from ancient life are an *integral* part of the Earth’s resources, offering scientists a more *accurate* picture of ancient life-forms. One key to ancient life comes in the form of petrified matter. Petrification is a process that slowly turns the remains of a living object into stone. In this process, minerals *seep* into a mass of organic matter. After the organic matter has been replaced, a mineral version of the living object is left. Petrification often occurs in trees that are found *adjacent* to rivers, floodable areas, and volcanoes, which provide the mud or ash that initially covers the organic matter. Some pieces of petrified wood *retain* the original

**Bonus Structure—**  
In this context,  
**today** means “at  
present; at this time  
in history.”

cellular *structure* of the wood and the grain can be easily seen. **Today**, it is *feasible* to petrify wood in a simple laboratory process.

Fossils are another way that ancient life is preserved. Most fossils include an animal’s hard parts, such as teeth and bones. One type of fossil, called a trace fossil, may also include eggs, tooth marks, contents of the *guts*, and fossil excrement. Some products from ancient life offer us more than scientific knowledge. One such product is coal, a solid fuel of plant origin. It develops over millions of years, during which swamp vegetation is submerged in water, depleted of oxygen, and covered by layers and layers of sand and mud. These *overlapping* layers settle with the Earth’s movements and are *compressed* over time.

1. Which sentence best expresses the essential information of this passage?
  - a. Preserved life-forms, including petrified matter and fossils, teach us about ancient life.
  - b. The primary function for preserved life-forms is scientific discovery.
  - c. Scientists try to replicate natural processes that preserve ancient life-forms.
  - d. Ancient organic matter provides the most concentrated forms of energy known to humans.

As dependence on computers increases, so does the need for technical support. From *installation* of software to *detection* of viruses, computers require constant vigilance. Most larger companies find it most *expeditious* to maintain in-house computer staff. Many smaller companies, however, can't fund their own full-time, in-house technical help. Instead, many of them assign the task of computer *maintenance* to a current employee who may not have any formal training. Rather, these "computer buffs" have *derived* their skills through practice and self-training. These self-appointed tech specialists, however, often cannot solve bigger problems. What's more, they may see their office relations *corrode* when they are swamped with basic user questions that they simply don't have time to address. For these reasons, many small companies choose to employ a freelance technical assistant who *circulates* among clients on an as-needed basis. With their professional training, these consultants may propose *innovative* solutions to users' unique needs, which could vary from tracking inventory to *simulating* mechanized processes. They can *implement* new programs, train personnel, and escape the workplace before being asked, "How can I cut this file and paste it somewhere else?"

1. Which sentence best expresses the essential information of this passage?
  - a. Larger companies are better off using freelance technical consultants.
  - b. Computer maintenance and troubleshooting cuts into employee productivity.
  - c. Self-trained technical support personnel are often as effective as trained professionals.
  - d. Smaller companies may benefit from hiring occasional technical support.

2. The article implies that the question *How do I cut and paste a file?* is
- too basic to require professional attention
  - a good question to give to in-house tech support
  - appropriate for a freelancer to address
  - a good topic for a training program

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the questions that follow.

Most of the electricity in the United States is produced in steam turbines. There are many *discrete* steps in this process. In a steam turbine,

*combustion* of coal, petroleum, or natural gas heats water to make steam. The steam *rotates* a shaft that is connected to a generator that produces electricity. Finally, that electricity is converted by a transformer and *conveyed* from the turbine to its place of use. Many *sources* can provide energy to heat the water in a steam turbine. Coal is primary, producing 51 percent of the country's electricity. Another common way to heat water for steam turbines is through *nuclear* power. In nuclear fission, atoms of uranium fuel are hit by neutrons, *triggering* a continuous chain of fission that releases heat. In 2001, nuclear power generated 21 percent of the electricity in the United States. *Solar* power produces less than 1 percent of the United States' electricity needs, because it is not regularly available and harnessing it is more expensive than using fossil fuels. Dependence on electricity *permeates* daily life in the United States. **Still**, few people are aware of the many *components* of electricity production.

**Bonus Structure**—  
In this context, **still**  
means “even so;  
despite this.”

1. What does the author say about solar power?
  - a. It produces more electricity than any other source.
  - b. It is a relatively small source of energy for heating water in steam turbines.
  - c. Electricity producers are trying to use it more regularly.
  - d. Researchers are trying to make it cheaper to use.

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the question that follows.

Like other functions of the human mind, perception and memory are imperfect. When we tell a story about something that we witnessed, we may *intuitively* believe that our recollection is accurate. However, several factors bias our memories of events. To study this *anomaly*, let us look at the three steps of memory creation: *acquisition* of memory, storing of memory, and *retrieval*. At every stage of memory formation, distortion can occur. At the first stage, acquisition of memory, events are perceived and bits of information are prepared for storage in the brain. However, it is impossible for us to remember every single thing we observe. Through processes that are both *conscious* and unconscious, people determine which details they will focus on.

In its second stage, storage, memories can become further distorted. Over time, our memories *degrade*, as we forget portions of events. To compensate, we may even creatively fill in the *gap* created by the *recession* of long-term memory. Additionally, an individual's memory can be altered during the storage stage by *intervening* occurrences, which can

**Bonus Structure—**  
**In sum** means “to summarize; to give a short version of what has been stated.”

be subconsciously combined with previously stored memories. Last but not least, we search our memory to locate information. During recall, emotion also seems to play a part in memory distortion. **In sum**, our memories may not be the *indisputable* source of information that we would like them to be.

An introductory sentence for a brief summary of the passage is provided below. Complete the summary by selecting the three answer choices that express the most important ideas in the passage. In each blank, write the letter of one of your choices.

Memory provides an imperfect record of events.

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the questions that follow.

The man was *decrepit*. With high blood pressure, cancer, and liver *disease*, he *aggravated* his situation by smoking. His *prognosis* was death. His advanced lung cancer was *terminal*, and his family members knew that he would pass away soon. So no one was surprised to find him dead on that sharp winter Thursday, no one, that is, except one sharp-eyed detective,

who noticed the bedroom window ajar on the morning of the old man's death. Would a *fatally* ill person be likely to sleep with the window open on a freezing cold night?

This question occupied *forensic* specialists from the medical examiner's office. There, an autopsy revealed an unlikely wound on the victim's thigh. Such a wound could easily have been inflicted by someone administering medicine . . . or poison. From there, the poison could travel through the *veins*, shutting down vital organs and causing death within seconds.

**Indeed**, the death turned out to be murder in the first degree. Criminal investigators *persisted* in their questioning of friends and family, only later finding the motive: money. Two distant relatives who stood to inherit large sums from the old man's estate plotted the death, believing that the old man's death would not be questioned.

**Bonus Structure**—  
**Indeed** indicates that an idea in an earlier paragraph was actually true.

1. Why does the author mention a wound?
  - a. The wound caused the death.
  - b. It was evidence of a struggle.
  - c. It was suspicious.
  - d. It was predictable, considering the man's disease.
2. In the passage, the word inherit is closest in meaning to

Since 1992, the number of cosmetic surgery *procedures* has risen 175 percent in the United States. Two of the most popular are liposuction and breast *augmentation*. In liposuction, the doctor *inserts* a small tube into the skin that sucks fat from the body. And while it may sound easy, it isn't. Liposuction is so painful that people are often given *anesthesia*. **What's more**, liposuction is not really a *cure* for *obesity*. Rather, it should be used when diet and exercise do not reduce fat in certain "trouble spots." Another common cosmetic procedure is breast augmentation. In this procedure, an *implant* is inserted through the armpit, making the breasts appear larger. Breast augmentation usually leaves only a small *scar*. Some common *complications* include the effects of anesthesia, infection, swelling, redness, bleeding, and pain. To reduce these risks, consumers are advised to be sure that their surgeon is board-*certified*.

**Bonus Structure—**  
**What's more**  
*means "in addition;

Some say that sailors are a superstitious group. Long nights of watching stars predispose them to a belief in *astrology*. Long periods of isolation lead them to believe in *psychic* phenomena that others would laugh at. This may explain sailors' frequent reports of seeing *phantom* ships. From the Gulf of Mexico, across the Atlantic, and to the South China Sea, sailors often claim that such vessels *haunt* the seas. One of the most famous stories of ghost ships is the *Flying Dutchman*, which sailed in 1680 from Amsterdam to Dutch East India under Hendrick Vanderdecken. When the captain ignored the danger warnings of a storm, his ship was smashed and the crew was lost. According to legend, his arrogance *invoked* the wrath of God, who condemned the lost crewmembers to battle the waters off the Cape of Good Hope for eternity. Since then, there have been repeated sightings of the *Flying Dutchman*, one as recent as 1939. Many sightings of phantom ships occur in areas where vessels are known to have sunk. Sailors can never *divine* when or where they will next encounter a phantom ship. Rather, most of their sightings occur randomly, only later to bring forth information of a former sea *horror*. Some say that ghosts aboard a phantom ship are trying to use living sailors as their *intermediaries*. Still others think that the existence of phantom ships is merely a *self-perpetuating* myth for bored sailors who are prone to too much idle *meditation* about the meaning of life and death on the high seas.

1. How would the author explain phantom ships?
  - a. Their appearance is tied to the stars.
  - b. Sailors at sea have little to do.
  - c. Fog and high waves can distort one's vision.
  - d. Shipwreck remains haunt oceans around the world.
  
2. Why does the author mention the *Flying Dutchman*?
  - a. as the basis of primitive navigation systems
  - b. as an example of a commonly sighted phantom ship
  - c. as the reason why many sailors have mental problems
  - d. as an explanation for sightings of phantom ships

The aborigines of Australia may have been some of the first people on the planet. Recent discoveries of *relics*, including stone tools, show that

humans lived near Penrith, New South Wales, about 47,000 years ago. Australian aborigines migrated from northern lands by sea, when the water passages were narrower than they are today. This is the first

evidence of sea travel by prehistoric humans. The *saga* of this water passing survives in modern-day aboriginal *folklore*. **To put this in perspective**, remember that 50,000 years ago, humans were nomadic. Early aborigines did not cultivate crops, and in Australia at the time there were no animals that could be *domesticated*. No one knows how long it took aboriginal people to reach Australia, but archaeologists are

searching through ancient campsites for *vestiges* of their early lifestyle. *Fossilized* remains indicate that these nomadic people not only gathered food from the land, but they also subsisted on meat from large animals that no longer exist today. As part of their hunting tradition, aborigines *ritually* covered themselves in mud to mask their own scent or for camouflage. Aboriginal society marked the major events of life with *rites* such as circumcision, marriage, and *cremation*. Older people were revered and cared for as great sources of wisdom. When Westerners arrived in Australia in 1788, the 300,000 aborigines who lived there were not eager to *assimilate* their ways. In the following years, disease, loss of land, and loss of identity shaped the aborigines’ history perhaps as much as their first prehistoric crossing from the north.

1. Which sentence best expresses the essential information in this passage?
  - a. Australian aborigines were some of the Earth’s first people.
  - b. White explorers did not respect aboriginal culture.
  - c. Australian aborigines probably migrated from Africa.
  - d. The organization and functioning of aboriginal society is mostly unknown.

Nelson Mandela devoted his life to fighting *prejudice* in South Africa. Mandela traveled his state, organizing a fight against *discriminatory* laws and racial *bias*. He encouraged civil disobedience as a tool against the *oppression* of Blacks. As deputy president of the African National Congress, Mandela encouraged his fellow citizens to challenge the prevailing *paradigm* of power. Mandela believed that prejudice *burdened* not only the oppressed, but also the oppressors.

The government *countered* Mandela's activities with a criminal conviction. Still, Mandela's *de facto* leadership gained him respect and authority among his fellow citizens. Mandela's courage and popularity worried **the ruling class**, who did not want to share power. What's more, they refused to *amend* the state's laws. So when Mandela returned from an overseas trip to gain support for his cause in 1962, he was arrested, jailed, and sentenced to life in prison for various crimes.

This only fueled Mandela's *notions* about inequality and justice. He took his demands to jail, where he demanded the same dress and safety gear for Black prisoners as for White prisoners. After 28 years in prison, Mandela was released, returning immediately to public life. In 1994, he was elected the president of South Africa.

**Bonus Structure—**  
The ruling class means those who held power mostly because of the families they were born into.

In the last three decades, universities across the United States have attempted to adapt their *curriculums* to meet the changing purposes of higher education. University education was also once considered an exclusive opportunity, with *erudite* scholars establishing courses based on the goal of training a *distinctly* academic "elite." These days, not every

undergraduate is destined to become a scholar, and the *roster* of students represents a more complete cross section of society, including minorities, women, and returning students. These days, most learners attend university to *fortify* basic skills, primarily learning how to learn and how to express themselves. Far from its earlier religious or elitist image, the university is seen increasingly as a *secular* center for career development, where students know they will graduate into a competitive job market. Most professors have embraced this evolution in the university's role,

The Roman *conquest* of North Africa is, in the *prevailing* view, less interesting than Rome's European adventures. In truth, one of the first

lands Rome *annexed* beyond the Italian peninsula was the area around Carthage in North Africa. Carthage and Rome had been in conflict (called the Punic Wars) since 264 BCE for control of trade along the Mediterranean coast. In 202 BCE, during the Second Punic War, the Carthaginian general Hannibal *devised* a clever plan, in *violation* of most military wisdom, to march through the high Alps to attack the Roman heartland. The cold weather and steep terrain *severely* stressed Hannibal's forces, many of whom rode elephants. The Romans *resisted* Hannibal's attacks, and his bold *invasion* force *collapsed*. **In the end**, Rome finished off Carthage in the Third Punic War (149–146 BCE). **TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the questions that follow.

Revisionist history promotes a new view of *chronological* events, usually for political purposes. Radical revisionists *diminish* the credibility of a previous view and may even *deny* that certain events happened at all. Some revisionist Asian historians have ignored long-standing conflicts among native peoples and have explained Asia's conflicts as a *consequence* of colonialism and its class-oriented cultural *milieu*. **Good motives** among the revisionists—to promote *reconciliation* among traditional rivals—**don't excuse bad history**. History is valuable only if its stories *coincide* with verifiable facts. From far away, an observer may see clearly that a given conflict had nothing to do with colonialism and a lot to do with 1,000-year-old rivalries. But this is not likely to matter much to a confirmed revisionist historian. At its *core*, revisionism—by the government in particular—is an *Orwellian* exercise in thought control, not honest science.

**Bonus Structure**—  
Good motives don't excuse bad history. Even though revisionists are trying to achieve a good social goal, they shouldn't distort history to do so.

1. Which sentence best expresses the essential information of this passage?
  - a. Historians constantly revise history in the light of new facts.
  - b. Revisionist history is less concerned with accuracy than with promoting a point of view.
  - c. A new way of studying history, revisionism, has been very successful in Asia.
  - d. Revisionist history is the only way to accurately relate events.
2. Why does the author of this reading mention Asia?
  - a. because it offers an example of attempts at revisionist history
  - b. because a civil war occurred between revisionists and others
  - c. because it is the birthplace of revisionist history
  - d. because it was colonized by Europeans and needs a revisionist history

## Definitions and Samples

1. **allocate** *v.* To give out different amounts for different purposes

The budget **allocates** \$58 billion to the military and only about \$2 billion to education.

**Usage tips** Things that can be *allocated* are things that can be “spent” — money, time, energy, etc.

**Parts of speech** allocation *n*

2. **commodity** *n.* A thing that can be bought and sold, such as grain, oil, or wood

Tulip bulbs were one of the most valuable **commodities** in seventeenth-century Holland.

**Usage tips** A thing is called a *commodity* only in the context of buying or selling it.

3. **decline** *v.* To decrease in power or amount

America's railroads **declined** because the automobile dominated American life.

*Parts of speech* decline *n*

4. **equity** *n.* The value of one's share in an investment

Barnard's **equity** in the business was one-third, or about \$350,000.

*Usage tips* In this meaning, *equity* is always singular and usually followed by an *in* phrase.

5. **inflation** *n.* A situation in which prices for many items rise quite fast

During the rapid **inflation** of the 1970s, prices for food and fuel sometimes rose 20 percent in a single month.

*Parts of speech* inflate *v.*, inflationary *adj*

6. **net** *adj.* After all costs have been subtracted from an amount

My gross salary is around \$35,000, but my **net** pay is closer to \$29,000.

*Parts of speech* net *v.*, net *n*

7. **per capita** *adv.* For each person

Research shows we're likely to sell 15 light bulbs **per capita** per year in medium-sized cities.

*Parts of speech* per capita *adj*

8. **regulate** *v.* Control according to a set of rules

Trading on the New York Stock Exchange is **regulated** by officials of the exchange and by federal law.

4. Cortecal Inc. estimates that it spends \$80.00 (per capita / net) on its annual picnic and on its New Year party for the company's 1,300 employees.
5. I think that artificial "holidays" like Valentine's Day or Secretary's Day are just an attempt to turn private feelings into a(n) (commodity / equity).

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the questions that follow.

The great unsettled question of economics is: "How much should the government *regulate* business?" Conservatives generally argue for a

*decline* in government involvement, but they favor certain *subsidies* to farmers, steelmakers, or airplane manufacturers. Some conservatives also see no conflict between their small-government views and their eagerness for the government to *allocate* more money for roads into national forests. The *net* result of these incursions into national forests is a *tangible* infrastructure that helps some companies but not the public. Publicly

owned trees, land, and oil become *commodities* from which a few private companies (many owned by small-government conservatives) profit. No *per capita* benefit goes to the American people, **aside perhaps from** the brief anti-*inflation* effect that comes with new oil exploration.

1. What is the main idea of this reading?
  - a. Conservatives have tried to keep others from expanding government regulations.
  - b. Even though conservatives say they want to limit government involvement in business, they actually do often favor it.
  - c. There are several views about the proper role for government in business.
  - d. Small-government conservatives want the government to allocate a certain amount of federal money per capita to help all Americans.
  
2. Which of the following does the author claim?
  - a. Industries will become subsidies.
  - b. Oil exploration causes inflation.
  - c. Some elements of nature will become commodities.
  - d. Infrastructure will be made of trees, oil, and land.

*Parts of speech* luxuriate *v.*, luxurious *adj*

6. **nobility** *n.* A group of socially prominent people with special titles given by a king or queen, such as “duke” or “countess”

In the Middle Ages, the **nobility** supposedly followed a code that required them to take care of poorer people who lived near their estates.

*Usage tips* *Nobility* is used as a name for a group of distinguished people; it can also mean “a highly dignified form of behavior.”

*Parts of speech* noble *n.*, noble *adj*

7. **prestige** *n.* Honor and respect for being better than the average

The Grassleys enjoyed the **prestige** of living in the historic town, but they did not feel at home there.

*Parts of speech* prestigious *adj*

8. **privileged** *adj.* Able to enjoy special advantages because of one’s position (usually because of being born into a wealthy or powerful family)

Despite his **privileged** position in one of America’s most powerful families, the politician tried to portray himself as an ordinary person.

*Parts of speech* privilege *n*

9. **prosper** *v.* To do very well in one’s business or personal life

Vargas **prospered** after finally patenting his new inventions.

**Usage tips** A person can prosper; so can a group, a company, or an area.

**Parts of speech** prosperity *n*, prosperous *adj*

10. **working class** *n*. People with low-paying (often unskilled) jobs who are not poor but who are not securely in the middle class

The Farrelly family, like other members of the **working class**, were proud of their jobs and did not want any handouts from charity or the government.

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the questions that follow.

**Bonus Structure**—  
The reference to studies in the 1970s indicates some objective evidence for the author's point.

The United States is not the land of equal opportunity. There are no titles of *nobility* as in Europe, but astounding *affluence* is passed on in *privileged* families, and this makes all the difference. **Studies in the 1970s** found that a child of the *elite* and a child of the *working class* may start out with similar intelligence and drive, but the rich child is about 30 times more likely to *prosper*. The rich child goes to high-*prestige* schools, where his or her education may be only slightly above average, but where the child *accumulates* friendships with future leaders. The privileged child becomes comfortable with *luxury* and is at ease in situations where powerful people meet. The working-class child from a less-prestigious college is not likely to wind up *impoverished*, but neither is he or she likely to attend many parties of Yale or Vassar alumni.

1. Which sentence best expresses the essential information of this passage?
  - a. The American economy is unfair and must be changed.
  - b. Rich people have natural advantages in education and social contacts that help them succeed.
  - c. Children accept one another as friends; only later in life do differences of wealth drive them apart.
  - d. The only way to make money in America is to work and accumulate it yourself.
2. Why does the author of this reading mention Yale and Vassar?
  - a. They are elite schools attended by many future leaders.
  - b. They are where government officials have secret meetings.

- c. They try to give working-class children a chance they can't get at other schools.
- d. Their high fees impoverish working-class children.

## Definitions and Samples

1. **acquire** *v.* To get something, usually something with special value or meaning

Bart hoped to **acquire** the 1898 D Indian Head penny, which would make his collection complete.

**Usage tips** Unlike *get*, *acquire* implies that a possession has special value or meaning.

**Parts of speech** acquisition *n*, acquisitive *adj*

2. **assess** *v.* To estimate the value of something

The Barnes building was **assessed** at \$1.3 million, but it can probably sell for much more than that.

**Parts of speech** assessor *n*, assessment *n*

3. **asset** *n.* A possession that has positive value

**Usage tips** Some examples of assets are real estate, cash, and stock shares.

4. **hazardous** *adj.* Dangerous

Parents have to be careful not to buy children's clothes and toys made of **hazardous** materials.

**Parts of speech** hazard *n*, hazardously *adv*

5. **jointly** *adv.* Together with one or more other parties

In most states, a husband and wife are assumed to own all their possessions **jointly**.

**Parts of speech** join *v*, joint *n*

6. **lease** *v.* To rent something for a long time (several months or years)

Some drivers prefer to **lease** a car rather than buy one.

**Parts of speech** lease *n*, lessor *n*, lessee *n*

7. **liability** *n.* Legal responsibility for harming a person or property; a disadvantage

Before you go river rafting, you sign a document releasing the trip leaders from **liability** in case of injury.

Henderson is just a **liability** to our work team, because he never finishes anything on time.

**Usage tips** In its second meaning, *liability* is often followed by a *to* phrase.

**Parts of speech** liable *adj*

8. **proprietor** *n.* Owner, usually of a business or a building

The **proprietor** of Hekman's Windows is Nels Hekman, grandson of the people who established the factory.

- Some people are born with the disease, but others (acquire / assess) it later in life.

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the questions that follow.

It is not easy to make a living as the *proprietor* of apartment buildings. There is a huge initial expense, not only to *acquire* the properties but to assess the buildings and to remove any *hazardous* materials like lead-

based paint. A landlord also has to buy the best *liability* insurance available just to *safeguard* the investment. Otherwise, one tragic accident could wipe out the value of the entire *asset*. Because of this expense, **it's rare** to find a *sole* individual owning such a property. The risk is more often taken on *jointly* by a group of investors who then split the profits from the *leases*.

**Bonus Structure—**  
It's rare is the opposite of "it's common."

1. What is the main idea of this reading?
  - a. Being a landlord is enjoyable.
  - b. It costs a lot of money to be a landlord.
  - c. Friendships can be destroyed by owning property jointly.
  - d. Income from leases is greater than a landlord's expenses.
2. Which of the following is *not* an expense mentioned in the reading?
  - a. property taxes
  - b. insurance
  - c. making the property safe

**TOEFL Prep II** Circle the word that best completes each sentence.

- Some companies move their factories to poor countries in order to (exploit / compensate) the desperation of people who are willing to work for very low wages.
- For the last five years, we've seen only (dynamic / marginal) improvements in our productivity.
- Judging by actual money-generating (promotion / merit), Williams is the company's most valuable employee.

4. I had a lot of (compensation / incentive) to move to our new facility in Minnesota, because two of my brothers live there.
5. Unless my employer stops polluting local rivers, I'm going to (resign / exploit).

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the questions that follow.

In the 1960s and 1970s, America was reaching the end of its role as a manufacturing power. Old-style systems of *compensation*, especially company pension plans, were impoverishing many companies. Much to the disadvantage of less-*industrious* workers, companies started demanding *merit*, not just seniority, before someone could be *promoted*. Many managers who were only *marginally* effective were encouraged to *resign*. These changes were painful, but unavoidable, symptoms of a growth spurt in the U.S. economy. Economies grow and change just as people do. A truly *enterprising* businessperson knows how to *exploit* these large changes and become involved in tomorrow's *dynamic* businesses, not yesterday's. There's still plenty of money to be made in America, a very effective *incentive* for workers to adapt to new conditions.

1. Which sentence best expresses the essential information of this passage?
  - a. Most companies cannot afford to compensate their employees like they used to.
  - b. Anyone interested in making a lot of money should move to the United States.
  - c. The 1960s and 1970s were times of great change for the American economy.
  - d. Just as retailers adapt to economic change, so must manufacturers.
2. The author of this article expresses a negative opinion about \_\_\_\_\_.
  - a. businesspersons
  - b. workers who depended on seniority for promotion

- c. companies that exploit changes in the economy
- d. the American economy as a whole

In the history of U.S. presidential *elections*, the year 1876 stands out as one of the oddest. That year, *polls* suggested that one person had won the popular vote but another had won more official electoral votes—just as happened in the year 2000. In 1876, however, the election was so *bitterly contested* that a special electoral commission was given the *authority* to determine which *candidate*—Republican Rutherford B. Hayes or Democrat Samuel J. Tilden—had won. This commission represented a *coalition* of interests. The Democrats favored this because otherwise the head of the Senate, Republican Thomas Ferry, would probably have been allowed to declare the winner. In the end, the Democrats were disappointed, as the commission *advocated* the Republican cause. The

situation was not settled until March 2 of 1877, only three days before the scheduled *inauguration* of a new president—Hayes, **as it turned out**. Only then did America find out who its new leader would be. Americans seem not to have learned many lessons from 1876, however, because in 2000 there was still no official *policy* on how to settle an election that hung on a few contested votes. The problem was settled (by the

Supreme Court) much faster in 2000, but still, no real system had been set up to deal with the situation.

1. In what way was the 1876 election even odder than that in 2000?
  - a. It happened much earlier.
  - b. It involved only two major candidates.
  - c. One person won the popular vote and another won the electoral vote.
  - d. The uncertainty over who would win the presidency lasted many months.

- Juries are instructed to arrive at a unanimous (verdict / convict), one agreeable to all members of the jury.

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the questions that follow.

One of the most controversial murder cases of the twentieth century was that involving the death of Marilyn Sheppard in 1954. Her husband, Dr. Sam Sheppard, was *accused* of killing her and then injuring himself. An unlikely *suspect*, Sheppard was highly respected by his *peers* in the medical world. Still, there were odd aspects to the murder that Sheppard could not explain away. Unfortunately for Sheppard, none of his supporters actually *witnessed* the crime, so nobody could back up Sheppard's claim that the real killer was a bushy-haired man whom Sheppard had chased across his lawn and fought with briefly.

Sheppard was eventually *convicted* of the *offense*, **but** many people **doubted** the *verdict*. With aggressive help from a lawyer named F. Lee Bailey, Sheppard got a new trial. Bailey suggested many alternatives to Sheppard's guilt, enough that the new jury could not say he was *guilty* beyond a reasonable doubt. Sheppard was released from prison but died soon afterward. His son, Chip, pursued the case through several *civil* and criminal proceedings in an attempt to find out the truth about his mother's murder. Late in the 1990s, new DNA analysis techniques proved that someone other than Sam Sheppard and his family had been in the house that night. Sheppard's story about the bushy-haired man had probably been accurate all along.

**Bonus Structure—**  
The clause containing **but** and **doubt** signals that arguments against the verdict will be given.

1. Why was the Sheppard case unusual?
  - a. A husband was accused of murdering his wife.
  - b. The murder occurred in 1954.
  - c. Doubt about the guilty verdict led to a second trial.
  - d. The accused murderer said he didn't do it.

The Fourth Amendment to the U.S. Constitution protects citizens from unreasonable search and seizure. Some civil libertarians have *condemned* the federal antidrug *bureaucracy* for threatening this basic right. In a drug case, police need no *evidence* to *intrude* on private property, *apprehend* a suspected dealer, and *seize* all the person's property. Property taken under this law may be sold for a profit later by the law-enforcement officials involved in the raid. The target of a raid might be *implicated* only by an unreliable report from an unfriendly neighbor. The police are not required to *ascertain* whether there's any physical evidence of drug activity at the site.

**Bonus Structure—**  
This refers to the whole situation described in the previous sentence, not to any one noun phrase.

In 1979, two British farmers reported that, while sitting on a hill, they suddenly saw the crops below flattened in a perfect circle. They *inferred* that some great force must have come down directly from above to squash the corn and barley. **This** started a public hysteria about so-called crop circles. The patterns pressed into the crops (not all of them

were circles) seemed to have no entry or exit points. Many people *hypothesized* that only alien spaceships could make such bizarre imprints. Others, including Britain's police, *assailed* such wild conclusions. They had a *contrary* theory: Someone was playing a big hoax. Teams of investigators took samples of the plants and the soil, trying to *objectively analyze* the crop circles as if they were a crime scene. Public curiosity often *impaired* the investigators, who had to *tolerate* busloads of tourists flocking to the circles. The farmers in the area, long *suspicious* of the police, approached the case as an instance of police *versus* the people. If the local farmers knew the circles were a hoax, they wouldn't say so.

1. According to the article, why did many people think that crop circles were created by alien spaceships?
  - a. The circles looked like they had been made from above and had no way in or out.
  - b. The observers in 1979 reported seeing a UFO land and make a crop circle.
  - c. The plants and soil inside a crop circle contained chemicals not found on Earth.
  - d. They were in unusual shapes and contained alien symbols.
  
2. Why does the author mention "a hoax"?
  - a. because one of the locals admitted playing a trick on his neighbors
  - b. because most people think that crop circles are evil
  - c. because police investigators thought crop circles were made by humans as a joke
  - d. because crop circles are probably made by secret government aircraft

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the question that follows.

The Spanish explorer Pizarro’s *abduction* of the Inca King Atahualpa came in 1529. His men *detained* the king, *coerced* the Incas into paying a large ransom in gold and silver, and then *intentionally* killed the king anyway. Their conquest of Peru established the legendary Spanish Main—Spanish holdings on the mainland of Central and South America. The *predicament* for Spain’s kings was how to get the riches of the New World to Spain. Pirates and privateers ruled the waves. To *distort* what was actually just robbery, the king of England issued “letters of marque,” licenses that turned certain pirates into agents of the British government. Their *piracy* against Spanish ships and Spanish gold was considered service to the king or queen of England.

Most pirates with such letters were social *deviants* anyway, and **predictably**, they became embarrassments to the British crown. In 1603, Britain’s King James I canceled all his government’s letters of marque. The many dangerous, unemployed pirates became buccaneers, a terrifying mix of tough characters that operated from the island of Hispaniola. They conducted merciless raids on Spanish settlements and formed a brotherhood known for theft, torture, *smuggling*, and *villainy* of all sorts.

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the questions that follow.

The nature of the family varies widely from culture to culture. In some societies, family members tend to stay in close *proximity* to their *kin*, never moving more than a few miles away from the *ancestral* home. In other places, while the members of one generation may all live near one another, their *descendants* in the next generation scatter widely. In such a case, it's difficult to maintain the same family *cohesion* enjoyed by those who live close together. Sometimes marriage can govern family structure; for example, there may be strict traditions requiring a new bride to leave her *paternal* home and *siblings* to move in with her new husband's family. Such traditions are followed, even by young couples who don't like them, because going against them is likely to result in the loss of *inheritance*. Whatever one's own *sentiments* about family structure, it is important to recognize that one culture's family system is as *legitimate* as another's.

1. Which of the following best states the main idea of this passage?
  - a. Different family systems can be found worldwide, but each one deserves respect.
  - b. Societies in which children move far away from their parents are not very cohesive.
  - c. Although some societies still require a wife to move in with her husband's family, this tradition is dying out.
  - d. The most important factor in family happiness is close proximity to your relatives.
2. According to this reading, which family system is most common?
  - a. Members of a family living in the same community.
  - b. Family members spreading out and living in various cities.
  - c. Young couples living with the man's parents.
  - d. It is impossible to tell from this reading.

- One of the main reasons to go to an exclusive college is that you get to (associate / fluctuate) with some of the country's future leaders.
- The court said that the club's membership rules were unjustly (willing / exclusive) because they kept out people of certain ethnic groups.

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the questions that follow.

You can walk into any high school and spot the *cliques*: the jocks hang out here, the geeks there, the Goths and preppies in their areas. Teenagers feel a strong need to belong to a group, to *associate* with people with whom they share common interests or goals. Since adolescence is often a time when teens feel turmoil in their home lives, they seek *affection* and friendship outside the home. They look for other young people to *bond* with when their parents don't seem to "understand." Teens going through the various crises of adolescence can more easily *confide* in others their own age, with whom they have more *in common*. Teen cliques are by no means *exclusive*; membership can *fluctuate* on an almost daily basis, but the important thing is that group members feel a sense of *solidarity* and are *willing* to stick together.

1. According to the reading, why do adolescents search for friendship outside the home?
  - a. They want to be accepted by the jocks and Goths.
  - b. They think their parents don't understand the problems they face.
  - c. They want to be in a different clique every day.
  - d. They want to talk about their parents with other teenagers.
2. According to the reading, do teens stay in the same groups all the time?
  - a. Yes, because their parents want them to.
  - b. Yes, because they share common interests.
  - c. No, they may move from group to group quite frequently.
  - d. No, most groups don't accept new members.

**TOEFL Success** Read the passage to review the new vocabulary you have learned. Answer the questions that follow.

Perhaps no emotion is more complex than *passion*. Passion can show itself in a negative way as a burst of anger, or in a more pleasant way, as love. Passion can *engender* blind *devotion* for a lover or plunge a person into *despondent* misery if he or she feels a lack of *reciprocity* in the relationship. Passion and love cause innumerable *dilemmas*, and people constantly seek out ways to understand these emotions, as evidenced by

the *proliferation* of articles, books, talk shows, and Web pages devoted to relationships. Many of these forums have *loyal* followings and have become cultural fixtures. The endless flow of information and opinions about the *complex* situations aroused by passion will probably not *vanish* anytime soon.

1. According to this article, which statement about passion is true?
  - a. It can have good or bad effects.
  - b. It can be easily explained.
  - c. It helps people decide what to do.
  - d. It is irrational.
  
2. According to the reading, why are there so many books and other works about passion?
  - a. because people want a lot of advice about love
  - b. because many people want to write about their own passion
  - c. because reading about passion is relaxing

- As a teenager, Dean did a lot of stupid things that he now feels (humiliation / shame) about.
- Many foreigners feel that their appearance (stigmatizes / despises) them in this country.
- Because the president was (obnoxious / contemptuous) of France's opinion long ago, the French are not eager to help him now.
- Mark (despises / berates) Henry and refuses to see him at all.
- Turkey's historic (antipathy / shame) toward Greece may be softening with the new generation.

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the questions that follow.

Some radio talk show hosts are masters of *obnoxious* insults. Callers to such shows should be prepared for *humiliation* if they dare to disagree with the host's views. The host controls whether the caller can speak, so

he can *arrogantly berate* the caller without allowing the caller to respond. Some shows, especially on AM radio, have hosts who are *contemptuous* of nearly everyone. They regularly use *vitriolic* language to *stigmatize* whole groups of people, such as foreigners, liberals, gays, or women. Some hosts don't actually *despise* the groups they insult. They simply use *antipathy* as a form of entertainment, and they seem to feel no *shame* about the damage they do.

1. Which phrase best describes the author's point of view?
  - a. The author enjoys listening to radio talk shows.
  - b. The author believes talk shows can cause damage.
  - c. The author thinks talk show hosts are disturbing but honest.
  - d. The author argues that hosts are ordinary people just doing their jobs.
  
2. Which people are often berated on radio talk shows, according to the author?
  - a. hosts
  - b. callers
  - c. listeners
  - d. advertisers

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the questions that follow.

Many *adolescents* and young adults go through a period when they *rebel* against what they perceive as an insincere world. Teens may take up *causes* such as radical environmentalism, protesting against the *status quo*. They may choose clothes that annoy their parents and associate with people from the *fringes* of society. This is a delicate period in a person's life, full of chances to make bad decisions that could lead to juvenile *delinquency* and even jail. **Conversely**, it can be a time of personal discovery that strengthens teens in a moral rejection of *hedonistic* lifestyles. At this age they may fearlessly speak up against *hypocritically* self-righteous authorities and against *manipulation* by the news media. These adolescent protests can lead to *conflicts* within families and communities, but stirring things up can also lead to serious reflection and positive change.

**Bonus Structure—**  
**Conversely means**  
“on the other  
hand.”

1. Which sentence best expresses the essential information of this passage?
  - a. Teens are hedonistic and self-serving.
  - b. Many teenagers are radical environmentalists.
  - c. Adolescents often create conflicts in their communities.
  - d. Teenage rebellion can cause problems, but it can be positive too.
  
2. According to the reading, what is one possible positive effect of teen rebellion?
  - a. Adults might try to make positive changes.
  - b. Teens may get in trouble with the police.
  - c. Teens may become responsible adults later in life.

**TOEFL Prep II** Circle the word that best completes each sentence.

- The materials that go into a work of art usually have little (abstract / intrinsic) value.
- In the 1970s, artists known as "the Boston School" revived (realism / context) by rejecting abstract techniques and trying to capture the actual appearance of their subjects.
- The colors of light that we can see are known as the visible (spectrum / perspective).

4. Medieval artists did not try to use (context / perspective) to give a sense of depth to their paintings.
5. The small, separate strokes of impressionist paintings give the works a dreamlike (portrayal / dimension).

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the questions that follow.

Whether something is “art” is largely a matter of opinion. Art that most people consider to have no *intrinsic* value can contain a great treasure of ideas and invention to someone who sees something special in it. Styles in all the arts range over a wide *spectrum*. Some good art is *esthetically* unchallenging and easy to understand. Other works are strange forms, **totally** out of *context* to everyone but the artist. One artist’s *portrayal* of an everyday object, such as a bouquet of flowers, may be grounded in *realism* and easily recognizable. Another painter’s *depiction* of the same bouquet may be very *abstract*, resembling flowers only in the artist’s mind. Regardless of the artist’s approach, the best art reveals new *dimensions* of experience and looks at the world from a fresh *perspective*.

**Bonus Structure—**  
**Totally means**  
 “completely” or “in every way.”

1. Which sentence best expresses the essential information of this passage?
  - a. Styles of art have changed throughout history.
  - b. Realistic art has more meaning than abstract art.
  - c. Esthetically pleasing art is too simple to contain much meaning.
  - d. Works of art can mean different things, depending on one’s perspective.
2. According to this reading, what is one big difference between abstract art and realistic art?
  - a. Abstract art is harder to sell.
  - b. Abstract art is harder to understand.
  - c. Abstract art is harder to produce.
  - d. Abstract art is harder to look at.

- Farley was a poor, \_\_\_\_\_ boy from a remote area who later taught himself to read and write.

**TOEFL Success** Read the passage to review the vocabulary you have learned. Answer the questions that follow.

Johannes Gutenberg's *ingenious* use of movable type in his printing press had a wide range of effects on European societies. **Most obviously**, readers no longer had to *decipher* odd handwriting, with *ambiguous* lettering, in order to read a written work. Gutenberg gave each letter standard forms, a move that had *connotations* far beyond the printing business. The *inscriptions* on tombstones and roadside mileposts, for example, could now be standardized. The cost of books decreased. Even *illiterate* people benefited indirectly from the *advent* of this invention, as the general level of information in society increased. However, Gutenberg's press was of limited use for languages that used picture-like symbols for writing instead of a *phonetic* system. Systems of *symbolic* pictographs, each of which *denotes* a word, require many thousands of characters to be cast into lead type by the printer. Phonetic systems, like the Latin alphabet, use the same few characters, recombined in thousands of ways to make different words.

**Bonus Structure—**  
**Most obviously** introduces an easy-to-see effect and implies that less-clear effects will come later.

1. According to this reading, how did the invention of the printing press benefit illiterate people?
  - a. It helped them learn to read.
  - b. It raised the level of information in a society.
  - c. It lowered the cost of books.
  - d. It saved them from having to read ambiguous handwriting.
2. Why was Gutenberg's press not very practical for languages that use picture-like symbols?
  - a. because character-based languages are made of pictographs
  - b. because phonetic alphabets are clearer
  - c. because there are too many characters to make movable type for each one
  - d. because Gutenberg was European, so he didn't know any character-based languages

belonging to a group and to try to keep up with style *trends*. The fashion industry exploits this natural desire and turns it into a *capricious*, impractical, and expensive rush from one style to another. For example, in one recent year, fashion did an abrupt about-face. Early in the year, fashionable outfits showed a *minimum* amount of fabric and a maximum amount of skin. By late summer, famous fashion designers were drowning people in *bulky, cumbersome* outfits that looked five sizes too big. *Vanity inhibits* people from looking realistically at *exotic* clothing fads. A *striking* new style catches their eye, they look at the clothes they're wearing, and they are suddenly *vulnerable* to the manipulation of the fashion industry.

1. Which word best describes the fashion industry, according to the author?
  - a. striking
  - b. minimum
  - c. capricious
  - d. vulnerable
  
2. What is one reason people buy the latest fashions, according to the author?
  - a. Because they want to feel like they are part of the group.
  - b. Because they enjoy spending money.
  - c. Because the fashion world is bizarre.
  - d. Because their clothes from last year don't fit.
